Cash and cash equivalents at end of the period	15	3,101	4,132

1) Cash-flows related to prepayments and incurred expenses for construction of new power plants are from 2023 presented as investing activities in line item "Investments in property, plants and equipment". Comparable numbers are correspondingly updated. The comparative amounts for 2022 prior to restatement were NOK -1,986 million for "Investments in property, plant and equipment" and NOK -926 million for "Increase/decrease in current assets and current liabilities".

2) Proceeds from sale of project assets, net of cash disposed, is cash received from sale of project assets less consolidated cash position in disposed projects at the time of disposal.

Notes to the Consolidated financial statements Group

Note 1 Corporate information

Scatec ASA is incorporated and domiciled in Norway. The address of its registered office is Askekroken 11, NO-0277 Oslo, Norway. Scatec ASA was established on 2 February 2007.

Scatec ASA ("the Company"), its subsidiaries and investments in associated companies and joint ventures ("the Group" or "Scatec") is a leading renewable energy solution provider, accelerating access to reliable and affordable clean energy in high growth markets. As a long-term player, we develop, build, own and operate renewable energy plants, with 4.2 GW in operation and under construction across four continents today (refer to Note 3 – Operating segments).

Information on the Group's structure is provided in Note 28 – Consolidated subsidiaries.

The Company is listed on the Oslo Stock Exchange under the ticker symbol 'SCATC'. For further details on shareholder matters, refer to Note 27 – Share capital, shareholder information and dividend.

The consolidated financial statements for the full year 2023 were authorised for issue in accordance with a resolution by the Board of Directors on 19 March 2024.

The Company is pursuing an integrated business model across the complete lifecycle of renewable power plants including project development, financing, construction, ownership, and operation and maintenance.

Note 2 Basis for preparation, basis of consolidation and key sources of estimation uncertainty

Basis for preparation

The Scatec Group's consolidated financial statements have been prepared in accordance with IFRS® Accounting Standards as adopted by the EU (IFRS). In compliance with the Norwegian Accounting Act, additional disclosure requirements are included in the notes to the financial statements of Scatec ASA.

The statement of cash flows is prepared under the indirect method.

The segment financials are reported on a proportionate basis in line with how the management team assesses the segments performance. For further description of the proportionate financials as well as a reconciliation between proportionate financials and the consolidated financials please refer to Note 3 - Operating segments and the section on Alternative Performance Measures (APM).

The functional currency of the companies in the Group is determined based on the nature of the primary economic environment in which each company operates. The consolidated financial statements are presented in Norwegian kroner (NOK) and on consolidation, the assets and liabilities of foreign entities with functional currencies other than NOK are

translated at the rate of exchange prevailing at the end of reporting period and their income statements are translated at average monthly exchange rates.

Basis of consolidation

The consolidated financial statements comprise the financial statements of the Parent and its subsidiaries as of 31 December 2023. When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee. Control is achieved when the Group has power over the investee, is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Estimation uncertainty

In preparation of the Group's consolidated financial statements, management has made assumptions and estimates about future events and applied judgements that affect the reported values of assets, liabilities, revenues, expenses and related disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The assumptions and

estimates are based on historical experience, current trends and other relevant factors available when the consolidated financial statements are prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes beyond the control of the Group. Such changes are reflected in the financial statements when the changes in assumptions occur.

Information about estimation uncertainty, judgements and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are largely incorporated into the individual notes.

The Group's management believes the following critical accounting item represent the more significant judgements and estimates not naturally belonging in the individual notes, but used in the preparation of the consolidated financial statements:

Consolidation of power plant companies

Scatec's value chain comprises all downstream activities such as project development, financing, construction, operations as well as having an asset management role through ownership of the power plants. Normally Scatec enter partnerships for the shareholding of the power plant companies. To be able to fully utilise the business model, Scatec normally seeks to obtain operational and financial control of the power plant companies. Operational control is obtained through governing bodies, shareholder agreements and other contractual arrangements. Other contractual arrangements may include Scatec's role as the developer of the project, EPC provider (construction), operation and maintenance service provider and asset management service provider.

Scatec would normally seek to undertake the following distinct roles in its projects:

1. As the largest shareholder providing equity financing to the project
2. As developer, including obtaining project rights, land permits, off taker agreements and other local approvals
3. As EPC contractor, responsible for the construction of the project
4. As provider of operation & maintenance services to the projects, responsible for the day to day operations of the plant
5. As provider of management services to the power plant companies

Even though none of the projects Scatec is involved with are identically structured, the five roles/activities described above constitute the main and relevant activities which affect the variable return. When assessing whether Scatec controls a power plant company, all facts and circumstances, including the above agreements are analysed. For the power plant companies consolidated in the financial statement, Scatec has concluded that it through its involvement controls the entities. Scatec has considered that it has the current ability to direct the relevant activities of the entities and has the ability to affect the variable returns through its power over the companies. The assessment of whether Scatec controls the investee is performed upon first time consolidation and is renewed annually or more often, if and when facts that could impact the conclusion change.

Please see individual notes and sections "Estimation uncertainty" for further details around other estimations, judgements and assumptions.

Note 3 Operating segments

Operating segments align with internal management reporting to the Group's chief operating decision makers, defined as the Executive Management team. The operating segments are determined based on differences in the nature of their operations, products and services. Scatec manages its operations in four segments: Power Production (PP), Services, Development & Construction (D&C) and Corporate.

Power Production

The Power Production segment manages the Group's power producing assets and derives its revenue from the production and sale of solar, winds and hydro generated electricity mainly based on long-term Power Purchase Agreements or Feed-in-tariffs. In the Philippines electricity is sold on bilateral contracts, in the spot market and as ancillary services. In Ukraine, for the Progressovka plants, changes in the local law in 2023 enabled Scatec to pause the PPA and sell electricity in the spot market while retaining the option to re-enter the PPA at a later stage. In addition, the segment includes revenues from the Release concept.

The performance obligation is to deliver a series of distinct goods (power) and the performance obligation is satisfied over time which entails that revenue should be recognised for each unit delivered at the transaction price. Revenue is recognised upon transfer of electricity produced to the local operator of the electricity grid, based on periodic meter readings. The Group applies a practical expedient under IFRS 15 whereby the revenue from power for most of the contracts is recognised at the amount of which the entity has a right to invoice. The right to invoice power arises when power is produced and delivered on to the electricity grid. The right to invoice the consideration will normally correspond directly with the value delivered to the customer.

Delivery is deemed complete when all the risks and rewards associated with ownership have been transferred to the buyer as contractually agreed, compensation has been contractually established and collection of the resulting receivable is probable. For all sales contracts the Group had per the end of year, indexation of tariffs is recognised when they come into force.

Services

The Services segment comprises Operations & Maintenance (O&M) and Asset Management services provided to power production plants where Scatec has economic interest. The services are delivered to ensure optimised operations of power producing assets through a complete and comprehensive range of services for technical and operational management.

O&M revenues are generated based on fixed service fees with additional profit-sharing arrangements. Asset Management services typically include financial reporting to sponsors and lenders, regulatory compliance, environmental and social management, as well as contract management on behalf of the power plant companies.

Revenues are based on service agreements with a periodic base fee as well as a potential performance bonus. These revenues are recognised as the service is provided. The potential performance revenues from the profit-sharing agreements are considered as variable consideration under IFRS 15 and are recognised when it is highly probable that the recognition will not be reversed in future periods.

Development & Construction

The Development & Construction segment derives its revenue from the sale of development rights and construction services to project entities set up to operate the Group's power production plants. These transactions are primarily made with entities that are under the control of the Group and hence eliminated when consolidated.

Construction services include operations where Scatec is responsible for the total scope of a turnkey installation of a power plant through a contract covering Engineering, Procurement and Construction. Revenues from construction services are based on fixed price contracts and are accounted for using the percentage of completion method. The percentage of completion of a contract is determined by actual cost incurred over total estimated costs to complete.

Scatec periodically revise contract profit estimates and immediately recognises any losses on contracts. Incurred costs include all direct materials, costs for modules, labor, subcontractor costs, and other direct costs related to contract performance. For items considered to be not distinct, Scatec recognises direct material costs as incurred costs when the main direct materials have been installed. Scatec considers direct materials to be installed when they are permanently attached or fitted to the power production systems as required by engineering designs. For items considered to be distinct, Scatec recognises direct material costs as incurred costs at change of title, dependent on the incoterms in the EPC supply of goods contract.

Some construction contracts include product warranties. The expected warranty amounts are recognised as an expense at the time of sale and are adjusted for subsequent changes in estimates or actual outcomes. The Group has currently ongoing construction projects in Pakistan and Brazil, as well as projects related to Release in Cameroon and South Africa.

Corporate

Corporate consists of the activities of corporate and management services. No segments have been aggregated to form these reporting segments. Revenues from transactions between the D&C, Services and PP segments, where Scatec is deemed to hold a controlling interest, are presented as internal revenues in the segment reporting, and eliminated in the consolidated statement of profit or loss.

Use of proportionate financials

The segment financials are reported on proportionate basis. With proportionate financials Scatec reports its share of revenues, expenses, profits and cash flows from its subsidiaries

without eliminations based on Scatec's economic interest in the subsidiaries. The Group introduced Proportionate Financials as the Group is of the opinion that this method improves earnings visibility and to improve transparency on underlying value creation across Scatec's business activity.

Revenues from transactions between group companies, where Scatec is deemed to hold a controlling interest, are presented as internal revenues in the segment reporting. These transactions are based on international contract standards and terms negotiated at arm's length with lenders and co-investors in each power plant company.

The consolidated revenues and profits are mainly generated in the Power Production segment. Activities in the Services and Development & Construction segment mainly reflect deliveries to other companies controlled by Scatec, or which revenues and profits are eliminated in the consolidated financial statements. The key differences between the proportionate and the consolidated (IFRS) financials are that:

- In the consolidated financials fully consolidated companies are presented on a 100% basis. In the proportionate financials the fully consolidated companies are presented based on Scatec's ownership percentage/economic interest. The residual ownerships interests in the table below represent the share of the proportionate financials in fully consolidated subsidiaries where Scatec do not have 100% economic interest.

- In the consolidated financials joint venture and associate companies are equity consolidated and are presented with Scatec's share of the net profit on a single line in the statement of profit or loss. In the proportionate financials the joint venture and associate companies are presented in the same way as other subsidiaries on a gross basis in each account in the statement of profit or loss based on Scatec economic interest. In the table below elimination of equity consolidated entities column shows the elimination of proportionate financials lines to arrive at Scatec's share of net income/(loss).
- Internal gains from transactions between segments are eliminated in the consolidated financials but are retained in the proportionate financials. These internal gains primarily relate to gross profit on D&C goods and services delivered to project companies. Hence, the consolidated financials have lower book value of solar plants than the proportionate financials and corresponding lower depreciation charges. Internal gain eliminations also include profit on Operations and Maintenance - and Asset Management services delivered to project companies.
- The management team assesses the performance of the operating segments based on a measure of gross profit and operating profit; hence interest income/expense is not disclosed on proportionate basis.

Bridge proportionate – to consolidated financials 2023

1) Refer to Note 14 Investments in joint venture and associated companies for details on Net income from JV and associates

2) Refer to Note 31 for details of the change in presentation of revenue and cost of sales for the Philippines

The Group has continued to recognise revenue from power production in Ukraine to the extent Scatec believes it is probable to collect the consideration, which is equal to actual paid amounts. The recognised amount in 2023 was NOK 371 million in the proportionate financials (NOK 440 million in the consolidated financials), which is in line with the paid amounts.

The Group has recognised net gain from sale of project assets in total amount of NOK 348 million in the proportionate financials (NOK 1,276 million in the consolidated financials) attributable to the strategic sales of the Uppington solar plants in South Africa and Mocuba solar plant in Mozambique, and to the divestment of 32% shareholding in Release, contributing with an accounting gain of NOK 485 million in the

consolidated financials. In 2023 the Group recognised an impairment charge of NOK 350 million in the Power Production segment in the proportionate financials (NOK 350 million in the consolidated financials included in the net income/(loss) from JVs and associated companies) related to

the power plant in Argentina. The Group has also recognised an impairment charge of NOK 65 million in the proportionate financials (NOK 48 million in the consolidated financials) in the D&C segment related to discontinued development projects.

In 2022 the Group recognised an impairment charge of NOK 770 million in the Power Production segment in the proportionate financials related to the solar power plants and intangible assets in Ukraine. In the consolidated financials the impairment charge amounts to NOK 816 million.

The Group recognised an impairment charge (in both consolidated and proportionate financials in the D&C

segment) of NOK 132 million related to discontinued development projects in Lesotho, Bangladesh, Mali and India.

Scatec also recognised an expected credit loss provision in 2022 with respect to trade and other receivables related to Ukraine which amount to NOK 87 million in the proportionate financials (NOK 98 million in the consolidated financials), which is included in other operating expenses

Geographical break down of consolidated revenues and PPE

In presenting information based on geographical areas, revenues from external customers are attributed to the country of the legal entity recording the sales. The allocation of property, plant and equipment is based on the geographical location of the assets. Projects that have not yet reached construction are allocated to the parent company being the main developer. The tables and information below include consolidated subsidiaries.

Consolidated revenues per country

Major customers

In South Africa, revenues (3 plants which commenced operations in 2013 and 2014 and 3 Uppington plants which commenced operations in 2020 and disposed in 2023) are earned under 20-year Power Purchase Agreements (PPA) with Eskom Holdings (South African incumbent utility), which was awarded under the Renewable Independent Power Producer Procurement Programme (REIPPPP) administered by the Department of Energy. Kenhardt plants started commercial operation in December 2023 under a 20-year PPA which was awarded under the Risk Mitigation Independent Power Producer procurement programme (RMIPPPP). Eskom's financial commitments under the PPA are guaranteed by the South African National Treasury under the Implementation Agreement.

The Benban plant in Egypt commenced operation in 2019. The electricity is sold under a 25-year Power Purchase Agreement with Egyptian Electricity Transmission Company, S.A.E. The financial commitments of Egyptian Electricity Transmission Company, S.A.E under the PPA are guaranteed by the sovereign guarantee from The Ministry of Finance under the Egyptian Law.

The Gurun plant in Malaysia commenced operation in 2018, the Merchang and Jasin plant commenced operation in 2019, and RedSol commenced operations in 2020. The electricity is sold under 21-year Power Purchase Agreements with the country's largest electricity utility, Tenaga Nasional Berhad (TNB). The PPA is not guaranteed by the Government as TNB is a reputable AAA rated listed company in Malaysia.

The Rengy plant in Ukraine commenced operation in 2019, Boguslav and Kamianka commenced operations in 2020 and Chigrin and Progressovka commenced operations in 2021. The electricity is sold under Power Purchase Agreements all ending 31 December 2029 with the state-owned company Guaranteed Buyer. The financial commitments of Guaranteed Buyer under the PPA are guaranteed by the State under the law on

Alternative Energy Sources and the *Law on Electric Energy Market*. In June 2023, Scatec started selling power from the Progressovka power plant in the spot market. The decision was made based on changes in the local law which enabled Scatec to pause the PPA, while retaining the option to re-enter the PPA at a later stage.

The Agua Fria power plants in Honduras commenced operations in 2015, whereas the Los Prados plants in Honduras commenced operation in 2018. The electricity from the plants is sold under a 20-year Power Purchase Agreement with the utility Empresa Nacional de Energía Eléctrica (ENEE). The financial commitments of ENEE under the PPA are guaranteed by the sovereign guarantee executed by the Honduran attorney general and the secretary of finance, approved by the National Congress of Honduras. As a result of the new Energy law which came into force in 2022 as introduced by the new Government of Honduras, the negotiations of the PPAs were ongoing during the year.

The Oryx, GLAE and EJRE power plants in Jordan commenced operations in 2016. The electricity is sold under a 20-year Power Purchase Agreement with National Electric Power Company (NEPCO). NEPCO's financial commitments under the PPA are guaranteed by the Government of Jordan represented by its Ministry of Finance under the Government Guarantee Agreement.

The Czech power plants commenced operations in 2009 (1 plant) and 2010 (3 plants) and have entered into power purchase agreements with utilities CEZ Distribuce and EON Distribuce, based on the terms of the Czech Energy Act and Czech Renewable Energy Act. This legislation requires the utilities to purchase the power produced from renewable energy sources for a period of 20 years at the Feed-in-Tariff (FiT) prescribed by law and applicable regulation, adjusted annually.

The Mocuba plant in Mozambique commenced operation in 2019. The electricity is sold under a 25-year Power Purchase

Agreement with Electricidade de Moçambique (EDM). The financial commitments of EDM under the PPA are guaranteed by The Mozambican government under the concession agreement approved under law 88/2016 of 5 December 2016 for 30 years. In December 2023 Scatec sold its equity share in the Mocuba plant. The consolidation of the project company ceased.

The Dam Nai wind farm in Vietnam was acquired by Scatec on 27 January 2021 and has a capacity of 39.4 MW. The wind farm was constructed in two phases and Phase I started operations in October 2017 (7.9 MW) and Phase II in December 2018 (31.5 MW). The electricity is sold under a 20-year Power Purchase Agreement with Vietnam Electricity, a state-owned company established by the government in Vietnam.

The ASYV power plant in Rwanda commenced operations in 2014. The power is sold under a 25-year Power Purchase Agreement with the state-owned utility EWSA, with an annual price adjustment of 100% of Rwandan CPI. EWSA's financial commitments under the PPA are guaranteed by the Government of Rwanda represented by its Ministry of Finance and Economic Planning under the Government Guarantee Agreement. In December 2023 Scatec signed an agreement to sell its equity share in the ASYV plant. The associated assets and liabilities are presented as held for sale as per 31 December 2023.

Total	43	47

For further details on employee benefits and management remuneration, refer to Note 4 Personnel expenses, number of employees and auditor's fee in the separate financial statements for the Parent Company. Reference is also given to the separate remuneration report issued by the parent company. No severance package agreements have been established with management.

Long term incentive programmes

The cost of equity-settled transactions is recognised in personnel expenses, together with a corresponding increase in equity over the vesting period. To calculate the fair value of the options that meets the definition of an equity-settled share-based payment transaction (IFRS 2 app. A), the BlackScholes-Merton option-pricing model is applied on each tranche. Share price (spot), exercise price, expected option lifetime, expected volatility, expected dividend and risk-free interest rate are the input parameters in the model.

In line with the terms adopted by the Annual General Meeting of Scatec ASA on 4 May 2016, and prolonged in the following years, the Board of Directors have established an option programme for leading employees of the company. Options are vested in tranches over a three-year period, with the first tranche vesting one year from award. As of December 31, 2023, there are options not fully vested from the grants awarded in 2021 and onwards. Each share option gives the right to subscribe for and be allotted one share in Scatec ASA. The strike prices are equivalent to the volume weighted average price of the shares the ten preceding trading days of the grant.

The fair value of the options is expensed over the vesting period. In 2023 NOK 29 million (39) have been expensed.

Date granted	Amount	Strike price	Lapse date
04/01/2021	138,567	314.91	01/01/2025
24/02/2021	7,617	314.91	01/01/2025
06/05/2021	116,176	244.28	01/01/2025
04/01/2022	635,730	150.79	01/01/2026
28/03/2022	10,000	134.53	01/01/2026
27/04/2022	14,353	124.34	01/01/2026
16/05/2022	16,711	96.16	01/01/2026
03/01/2023	1,201,148	80.25	01/01/2027
02/03/2023	67,516	80.25	01/01/2027
Sum	2,207,818		

For the options granted in 2023 the assumptions used in calculating the fair value of the options are as follows: 2.99 years (2.98 years) for expected lifetime, 52.45% (49.02%) for the expected volatility and 0 (0) for expected dividend. The calculations are based on average values.

During 2023 the employees exercised no options, compared to 51 thousand at the weighted average strike and share price of NOK 89.26 and NOK 130.30 in 2022.

See table below for total number of outstanding options under the long-term incentive programme and number of outstanding vested options.

Summary of movements in options

The impairment of expected credit loss in 2022 is related to receivables in Ukraine.

Government grants are recognised when it is reasonably certain that the company will meet the conditions stipulated for the grants and that the grants will be received. Grants are

recognised either as cost reduction or as a deduction of the asset's carrying amount. Scatec has in 2023 recognised government grants of NOK 12 million (27) in cost reductions and NOK 10 million (29) grants as deductions of the development and construction asset's carrying amount.

Note 7 Tax

Estimation uncertainty

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised based upon the likely timing and the level of future taxable profits.

When assessing the probability of utilising these losses several factors are considered, including if the entity in question has a history of losses, if there is an expiration date on the entity's ability to carry the losses forward and/or if the losses may be used to offset taxable income elsewhere in the Group. The majority of the Group's tax losses are related to favorable tax rules for depreciation of power plants and its reversal is merely a timing effect. Refer to paragraph below under specification of tax losses carried forward for further description.

Uncertain tax positions and potential tax exposures are analysed individually and, the best estimate of the probable

Effective tax rate

Calculated tax expense	114	-132
Effective tax rate	-11%	NA

The Group recognised an income tax benefit of NOK 114 million (-132) in 2023. The tax benefit is largely attributable to the Kenhardt plants (NOK 457 million) which qualified for the Enhanced renewable energy tax incentive after reaching Commercial Operating dates in the fourth quarter. This tax

amount for liabilities to be paid (unpaid potential tax exposure amounts, including penalties) and assets to be received (disputed tax positions for which payment has already been made), are recognised within current tax or net deferred tax as appropriate.

Management uses judgment in assessing the substance of each tax credit scheme. The Group accounts for investment tax credits in current tax in the year when the conditions required to receive the credits are met and they are claimed on the tax return. Investment tax credits that are unused recognised as deferred tax assets to the extent that it is probable that future taxable profit will be available against which unused tax credits can be utilised.

The Group has not identified any significant exposure to Pillar Two income taxes that require disclosure in the consolidated financial statements.

incentive granted a 25% additional tax deduction of the plants cost when the assets were put into use in 2023. The incentive will be settled as reduced tax payments in the coming years.

The net gain from the divestment of 32% of the shares in Release (NOK 485 million) and the gain on the sale of

Uppington solar plants in South Africa (NOK 744 million) are permanent differences and do not give rise to any tax expense. The items are presented as permanent differences on divestments in the table above.

The remaining difference between the Group's actual tax expense and a calculated tax expense based on the Norwegian tax rate of 22% is mainly due to different tax rates in the jurisdictions in which the companies operates,

withholding taxes paid on dividends, currency effects and effects from unrecognised tax losses. Further, the profit/loss from JVs and associates are reported net after tax which also impacts the effective tax rate.

The underlying tax rates in the companies in operation are in the range of 0% to 33%. In some markets, Scatec receives special tax incentives intended to promote investments in renewable energy.

Significant components of deferred tax assets

Malaysia	163	-	25	168	-	37
Other	11	-	105	11	-	64
Total	17,708	3,435	-3,058	9,845	1,540	-1,423

The Group has NOK 17,708 million (9,845) of tax losses carried forward. The balances are offset against taxable temporary differences within the same fiscal authority, mainly related to property, plant and equipment.

The losses carried forward in countries with power plant assets are mainly related to accelerated depreciation rates for power plant assets compared to the accounting depreciations which are determined by the useful life of the assets. The increase in losses carried forward for the Group in 2023 mainly derives

from losses in Kenhardt plants in South Africa due to accelerated depreciation as the plants were set in operation as well as additional tax deduction as described above. We assessed the probability of utilising the tax losses in all countries where tax losses were recognised to ensure that tax losses are recorded to the extent that the Group expects there will be sufficient future taxable profits available to utilise the losses. At year-end 2023 the Group has recorded a valuation allowance of NOK -623 million (-458) related to tax losses

carried forward which are not expected to be used to offset future taxable income. The valuation allowance is recognised in Norway (NOK 400 million), Egypt (NOK 171 million), Malaysia (NOK 39 million) and in other countries.

The tax losses in Egypt and Jordan can be carried forward for 5 years while all other tax losses in the Group can be carried forward indefinitely. All other tax losses in the Group can be carried forward indefinitely.

Movement in net deferred tax asset

NOK million	2023	2022
Net deferred tax asset at 1 January	117	159
Recognised in the consolidated statement of profit or loss	384	108

Effect of potential dilutive shares:		
Weighted average number of shares outstanding for the purpose of calculating diluted earnings per share	158.9	158.9
Earnings per share for income attributable to the equity holders of the company - diluted (NOK)	3.95	-8.40

Diluted earnings per share is affected by the option programme for equity-settled share-based payment transactions, refer to Note 4 Employee benefits. There is no diluted effect on earnings per share in case of loss.

Note 9 Sale of project assets and disposal group held for sale

Sale of project assets

Upington solar power plants in South Africa

On 2 February 2023, Scatec signed an agreement with a subsidiary of STANLIB Infrastructure Fund II, managed by STANLIB Asset Management Proprietary Limited ("Stanlib"), to sell its 42% equity share in the 258 MW Upington solar plants. The closing of the transaction took place on 31 May 2023. Total consideration, net after sales cost amounted to NOK 546 million. The transaction generated a net accounting gain of NOK 744 million on a consolidated basis presented in net gain/(loss) from sale of project assets.

With effect from the closing date, the consolidation of the project companies ceased, decreasing the total assets with

NOK 2,165 million, decreasing total liabilities with NOK 2,277 million, and increasing equity with NOK 198 million (Scatec's share). An accumulated foreign currency translation reserve (gain) of NOK 5 million was recycled from other comprehensive income to profit or loss as part of the deconsolidation. The reserve was recorded net with other foreign currency translation differences in other comprehensive income with the opposite entry presented as a foreign exchange income in the statement of profit or loss.

Guañizuil IIA solar power plant in Argentina

On 19 October 2023, Scatec ASA and Equinor ASA sold their shares in the 117 MW Guañizuil IIA solar power plant in

Argentina, as well as their shares in the local operating services company to Central Puerto. The solar power plant was impaired in amount of NOK 350 million, and the sales transaction did not generate any material accounting impact.

Mocuba solar power plant in Mozambique

On 18 July 2023, Scatec signed an agreement with Globeleq to sell its 52.5% equity share in the 40 MW Mocuba solar power plant in Mozambique for a gross consideration of NOK 86 million, in line with the Group's strategy. The closing of the transaction took place on 29 December 2023. The transaction has generated a net accounting gain of NOK 47 million on a consolidated basis presented in net gain/(loss) from sale of project assets. The consolidation of the project company ceased, decreasing the total assets with NOK 785 million, decreasing total liabilities with NOK 588 million, and decreasing equity with NOK 41 million (Scatec's share). An accumulated foreign currency translation reserve (gain) of NOK 21 million was recycled from other comprehensive income to profit or loss as part of the deconsolidation. The reserve was recorded net with other foreign currency translation differences in other comprehensive income with the opposite entry presented as a foreign exchange income in the statement of profit or loss.

Release

On 27 October 2023, Release closed NOK 1.1 billion transaction with Climate Fund Managers ("CFM"). CFM contributed approx. NOK 560 million in equity for a 32% shareholding in Release. Scatec retained the majority shareholding of 68%. CFM will also provide shareholder loans of approx. NOK 480 million, part of which will be on concessional terms. As a result of the transaction and in line with the shareholder agreement, Scatec lost control over Release. All assets and liabilities were deconsolidated and Scatec recognised an investment in joint venture at fair value at the acquisition date. Scatec recognised NOK 307 million of the notional goodwill which is allocated to the investment in Release. Notional goodwill is recorded in functional currency and as a result, changes in currency exchange rates affect the value of notional goodwill in NOK. Notional goodwill is not deductible for tax purposes.

The divestment of the 32% shareholding generated an accounting gain of NOK 485 million in the consolidated financial statements presented in net gain/(loss) from sale of project assets. An accumulated foreign currency translation reserve loss of NOK 10 million was recycled from other comprehensive income to profit or loss as part of the gain on sale.

Refer to Note 14 for details about profit and loss and financial position at stand alone basis for the acquired joint venture, including the bridge from Scatec's share of equity at stand alone basis to the carrying value of net investments in joint ventures at Group level.

Disposal group held for sale

On 19 December 2023, Scatec signed an agreement with Fortis Green Fund I Rwanda Holdings Ltd and Axian Energy Green Ltd to sell its 54% equity share in the 8.5 MW solar power plant in Rwanda for a gross consideration of NOK 14.2 million, in line with the Group's strategy. The associated assets and liabilities of the subsidiary are presented as held for sale as per

31 December 2023. The transaction is subject to the customary consents and is expected to be completed in 2024. Scatec is also exiting from the operations & maintenance and asset management agreements as part of the sale.

NOK million	Carrying value 31 December 2023
Assets classified as held for sale

Non-current non-recourse project financing	104
Current portion of non-recourse project financing	11
Other current and non-current liabilities	14
Total liabilities of disposal group held for sale	129

Note 10 Property, plant and equipment

Accounting principle

Power plants in operation

The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into operation, the initial estimate of an asset retirement obligation and, for qualifying assets, borrowing costs incurred in the construction period. All other borrowing costs are recognised in the profit or loss in the period in which they incur.

Depreciation of a power plant commences when the plant is ready for management's intended use, normally at the date of grid connection and commissioning.

Asset retirement obligations

Asset retirement costs are recognised when the Group has an obligation to dismantle and remove a power plant and to restore the site on which it is located. Expenditures related to asset retirement obligations are expected to be paid in the period between 2030 and 2050.

Other fixed assets

Other fixed assets mainly include office lease, fixtures and equipment. For accounting principles related to right to use lease assets, details are provided in Note 12 Leases.

Estimation uncertainty

Estimated useful life of power plants

The estimated useful lives of power plants are reviewed on an annual basis and changes in useful lives are accounted for prospectively.

In most of these markets the sale of electricity depends on having a PPA, hence, the length of the PPA is a relevant factor for determine useful life. The power plants currently in operation have 9 to 25 years off-take agreements. The technical useful life of power plants is subject to several factors such as climatic conditions and maintenance programme; however, it is expected to be 30 years. Technical useful life of storage equipment, such as the BESS (batter energy storage system) on the Kenhardt plant, is highly dependent on usage and number of charging cycles, but is expected to be 25 years.

The assessment is made on a plant-by-plant basis. Most of the Group's power plants are depreciated over the length of the PPA or up to 30 years based on expected usage.

Scatec's operational assets are insured through programmes against physical damage, including natural catastrophes and weather-related events, through a property damage & business interruption insurance. A similar insurance programme is also designed for projects under construction which cover physical damage, loss of income and transportation risks. Thus, potential physical damages of plants will be rebuilt and are not expected to impact useful life of the plants. Other climate related risks have been considered and are currently not assessed to impact useful life of the plants.

Capitalisation of development costs

Expenses relating to research activities (project opportunities) are recognised in the statement of profit or loss as they incur.

Expenses relating to development activities (project pipeline and backlog) are capitalised to the extent that the project is technically and commercially viable and the Group has sufficient resources to complete the development work. The assessment of project viability is based on completion of key development activities and includes management judgment.

The carrying value of development projects that have not yet reached the construction phase was NOK 332 million (232) at 31 December 2023.

Asset retirement obligations

Scatec's future asset retirement obligation depends on several factors such as the possible existence of a power market for the plants after the end of the PPA, future development of manhour and equipment costs, interest and currency exchange rates. The calculation of the asset retirement obligation includes significant judgment and is done on a plant-by-plant basis, taking into consideration relevant project specifics.

Impairments

Power plants and projects under development/construction are tested for impairment to the extent that indicators of impairment exist, please refer to Note 13 Impairment testing for details.

During 2023, the Group impaired NOK 48 million (132) related to discontinued development projects. In 2022 the Group impaired NOK 742 million related to solar power plants in Ukraine.

Note 11 Goodwill and other intangible assets

Overview

The Group's goodwill is mainly associated with the acquisitions of SN Power in 2021. The Group had no other intangible assets with an indefinite useful life than goodwill as of 31 December 2023 and 2022.

The Group's Other intangible assets consist of renewable operating license, right to transmit electricity and software. The estimated useful life of intangible assets with a finite lifetime are reviewed on an annual basis, and are amortised over 3-25 years.

No impairment charges were recognised in 2023 related to intangible assets. In 2022, the Group impaired NOK 74 million of other intangible assets in Ukraine related to the right to transmit electricity for the power solar plants. Please refer to Note 13 Impairment testing.

Estimation uncertainty

There is considerable estimate uncertainty associated to the value of intangible assets. Please refer to Note 13 Impairment testing for assessment of recoverable amount.

Note 12 Lease

Accounting principle

The Group primarily leases office and land where the power production plants are located, accounted for in accordance with IFRS 16.

The Group applies the recognition exemptions and recognises the lease payments as other operating expenses in the statement of profit or loss for leases of low value and leases with lease term less than 12 months. The future lease payments include fixed lease payments and variable lease payments that depend on an index or a rate. The Group recognises variable lease payments dependent on future events in profit or loss, this includes land lease expense where the lease payment is based on power production.

Estimation uncertainty

When calculating the lease liability and the right-of-use asset, the discount factor is a significant estimate. In the absence of an identifiable discount rate, implicit in the lease agreement,

the discount rate used is the Group's incremental borrowing rate. The incremental borrowing rate has been estimated by each subsidiary on an individual basis. For power producing entities, the interest rate on the non-recourse loans has been central when estimating the incremental borrowing rate. For other subsidiaries, non-secured debt has been used as a benchmark for the discount rate.

Several of the Group's lease agreements contain options to extend the lease agreement beyond the contractual lease term. As the extension period is at the end of the PPA period for land leases it is uncertain whether the option will be exercised. The Group has evaluated all these options, but it's not deemed reasonably certain that the Group will exercise the options, and hence, the period covered by these options has not been included in the lease liability. The Group reevaluate the options on a continuously basis.

Reconciliation of movement in right-of-use asset

Note 13 Impairment testing

Estimation uncertainty

An impairment loss is recognised when an asset or cash generating unit (CGU)'s carrying value exceeds the recoverable amount.

Factors which trigger impairment testing include, but are not limited to, political changes, macroeconomic fluctuations, changes to the Group's strategy, project delays, underperforming, changes to tariffs and similar. When an asset is constructed, certain assumptions are made for climate related factors such as irradiation and temperature. Deviations of such assumptions may lead to underperforming of assets, which if significant, may be an indicator of impairment. Furthermore, climate related changes are expected to have a pervasive effect on the energy industry which may impact regulations, remaining useful life and financial viability of our assets in the markets we operate in, and are considered in our impairment testing.

Recoverable amount calculations of value in use are based on a discounted cash flow model. The future cash flows include a number of estimates and assumptions, including future market conditions and energy prices, discount rates, estimated useful life and others. Climate risks such as more extreme weather and natural disasters, and changes to environmental regulations, may impact future cash flows through lower production or/and physical damages of the assets. Such risks are accounted for in the discount rates. The estimates are based on the Group's budgets and long-term outlooks approved by management. The recoverable amount is sensitive to changes in discount rate, expected production

rates, demand and price forecasts for power assets with variable income.

The Group monitors changes in government legislation on a continuous basis. Legal changes may impact key assumptions in the value in use calculations in future periods.

Impairment test – plants in operation

Tests for impairment have been performed for CGUs with mandatory annual tests and the CGUs where impairment indicators have been identified. The recoverable amounts for these units have been determined estimating the value in use of the assets and comparing against the carrying value of the CGUs.

In 2022 impairment indicators were identified for Scatec's five solar plants in Ukraine triggered by Russia's invasion. As a result of impairment assessment performed, an impairment loss of NOK 816 million was recognised. Per 31 December 2023, approximately 95% of the power plants owned and operated by Scatec are intact and available in Ukraine. Revenues from power production have however only been recognised in accordance with actual paid amounts since March 2022. The payment level was 66% in 2023.

In the fourth quarter 2023, the impairment tests were updated with new information. Three scenarios have been assessed and weighted to arrive at the value in use for the solar power plants. No significant events have triggered additional

impairment compared to recognised amount in 2022. For details please refer to the 2022 Annual Report.

Impairment test – development projects

In 2023 Scatec impaired NOK 48 million related to discontinued development projects in Brazil, Oman and Madagascar.

Annual mandatory impairment test - goodwill

The goodwill of the Group mainly relates to the acquisition of SN Power AS in 2021 (NOK 341 million). The goodwill relates to the portfolio of identified project development opportunities and assembled workforce. Consequently, the goodwill is allocated to and tested for impairment on the global Development & Construction operating segment. The goodwill has been tested for impairment with the following key assumptions and estimates:

Discount rate: The discount rates are based on the Weighted Average Cost of Capital (WACC) methodology. The discount rate used in the impairment calculations represent the current market assessment of the risks specific to a group of CGUs, taking into consideration any individual risks of the underlying assets that have not been incorporated in the cash flow estimates. Discount rates used in the value in use calculation is based on a discount rate before tax.

The pre-tax discount rate applied in 2023 is 8.9%.

Future cash flows: The recoverable amount has been determined based on the value in use calculations. The estimated cash flows correspond to the business plan a five-year period, which is based on the Group's project backlog and pipeline. The business plan is approved by the Board of Directors. Cash revenues have been calculated based on estimated project volumes and an average margin related to project execution. Cash expenses have been calculated based on budgeted operating expenses attributable to project execution activities. To the best of management's judgement, capital expenditure and changes in working capital are insignificant in relation to this calculation and are therefore excluded. The discounted free cash flows exceed the carrying amount and the asset is not impaired.

Sensitivity: The Group is of the view that no reasonably likely change in the key assumptions listed above would cause the carrying value to materially exceed the recoverable amount for any of the CGUs. An increase in WACC by 2 percentage point would not lead to impairment loss.

The Group has not recognised any impairments related to goodwill in 2023 or 2022 as the recoverable amounts exceed the carrying amount.

Note 14 Investments in joint venture and associated companies

Accounting principle

A joint venture or associate is an entity over which the Group has joint control or significant influence. The Group's investments in its associates and joint ventures are accounted for using the equity method. Under the equity method, the investment is initially recognised at cost and subsequently adjusted for further investments, distributions, and the Group's share of the net income from the associate or joint venture.

Estimation uncertainty

The considerations made in determining significant influence or joint control are similar to those necessary to determine control over subsidiaries. Refer to Note 2 Basis for preparation, basis for consolidation and key sources of estimation

uncertainty for significant judgements related to the assessment of whether Scatec controls an entity.

There is also considerable estimate uncertainty associated with the estimation of the excess values included in the net investment in joint venture and associated companies. The excess values mainly relate to water rights, and the estimated useful life of the water rights are reviewed on an annual basis and amortised over the remaining concession period.

The tables below show the material joint ventures and associated companies recognised in the Group and the reconciliation of the carrying amount.

Material joint ventures and associated companies

¹⁾ Mendubim project structure includes 13 SPVs, EPC and an operating company.

²⁾ Release project structure includes 11 companies

On 19 October 2023 Scatec ASA and Equinor sold their shares in the 117 MW Guañizuil IIA solar power plant in Argentina, as well as their shares in the local operating services company. The investments have been derecognised from the group accounts of Scatec.

On 27 October 2023 Release by Scatec (“Release”) closed the NOK 1.1 billion transaction with Climate Fund Managers (“CFM”). CFM contributed NOK 560 million in equity for a 32% stake in Release. Scatec retain the majority shareholding of 68%. All assets and liabilities were deconsolidated and Scatec’s investment in joint venture was recognised at fair value at the acquisition date.

Note 15 Cash and cash equivalents

NOK million	31 December 2023	31 December 2022
Cash in power plant companies in operation	1,747	2,057
Cash in power plant companies under development / construction	175	109
Other restricted cash	203	223
Free cash	977	1,743
Total cash and cash equivalents	3,101	4,132

Cash in power plant companies in operation includes restricted cash in proceed accounts, debt service reserve accounts, disbursements accounts, maintenance and insurance reserve accounts and similar. These cash and cash equivalents are only available to the Group through distributions as determined by shareholder and non-recourse financing agreements. Cash in assets held for sale of NOK 12 million is not included.

Cash in power plant companies under development and construction comprises shareholder financing and draw down on non-recourse financing debt to settle outstanding external EPC invoices. Other restricted cash comprises restricted deposits for withholding tax, guarantees, VAT and rent, NCI's share of free cash as well as collateralised shareholder

financing of power plant companies not yet distributed to the power plant companies.

As of 31 December 2023, NOK 117 million of the total cash is related to companies in Ukraine (of this NOK 88 million is cash in power plant companies). In Egypt, NOK 60 million is held in Egyptian pounds (of this NOK 40 million is cash in power plant companies). Refer to note 32 Subsequent events for further information.

Distribution in 2022 included refinancing proceeds from South Africa and Vietnam compared to no proceeds from refinancing in 2023. Capitalised expenditures and Scatec's share of equity investments in projects under development includes spending related to Botswana and the Grootfontein projects in South Africa, where constructions are planned to start in the first quarter of 2024. Scatec's share of equity investment in project under construction includes investment in Kenhardt projects in South Africa, which were in operation at the end of 2023.

Drawdown of credit facilities in Scatec ASA	713	-
Cash flow from financing	405	-404
Change in cash and cash equivalents	-766	-592
Free cash at beginning of period	1,743	2,335
Free cash at end of period	977	1,743
Available undrawn credit facilities	1,171	1,827
Total free cash and undrawn credit facilities at the end of period	2,148	3,570

1) Proportionate share of cash flow to equity is defined in Alternative Performance Measures Appendix.

2) Working capital/other in 2023 is mainly explained by payments for construction activities related to the Kenhardt project in South Africa and repayment of construction loan for Ukraine to PowerChina

Note 16 Trade receivables

Trade receivables are recognised for amounts owed from the customer. Accrued income represents contract assets related to energy production in the last month of the year, which is invoiced in January the following year.

The assessment of whether there is objective evidence that trade receivables is impaired is conducted based on the expected credit loss (ECL) approach. Under the approach, lifetime expected credit loss is recognised based on forward-looking information about possible default events. Information on credit risk and foreign exchange risk regarding trade receivables used in the ECL assessment is provided in Note 20 - Financial risk management.

Trade receivables

NOK million	2023	2022
Trade receivables	328	384
Accrued income and other receivables	247	210
Impairment for expected credit loss	-98	-98
Total trade and other receivables	478	497

Ageing of trade receivables at year-end was as follows:

NOK million	Total	Not due	Overdue
2023	328	244	86
2022	384	278	105

Expected credit loss is assessed on an individual instrument basis. The overdue receivables for the Group are mainly related to sale of electricity from power plants in Ukraine and Honduras, see further details below. For other jurisdictions in the Group, there are no evidence of change in credit risk for the performing trade receivables and no expected credit provision has been made.

Ukraine

On 28 March 2022 the Ministry of Energy of Ukraine issued an Order to reduce the amounts paid to the renewable power producers and the unpaid amounts are postponed to a later period. Due to the uncertainty related to future settlement, Scatec has from February 2022 only recognised revenues in accordance with actual paid amounts. In 2022 Scatec made an expected credit loss impairment of NOK 98 million reflecting the high uncertainty related to future settlement of trade and other receivables related to the period prior to the war. There have been no significant changes to the situation in 2023 nor increase in outstanding trade receivables, hence no changes to the provision were made.

Honduras

Scatec has experienced delays in payments from the state-owned off-takers of power in Honduras. Overdue payments have accumulated in Honduras to a varying degree since 2020. In 2023, ENEE has continued to settle outstanding receivables and paid a total of approximately NOK 180 million, leaving the balance at NOK 87 million as of year-end.

In 2022, a new Energy law came into force as introduced by the new Government of Honduras. In accordance with the new law, the state owned off-taker has proposed certain changes to the existing PPAs and settlement of outstanding receivables. Part of the outstanding receivables was settled at the end of 2022, and throughout 2023. Remaining outstanding amounts are expected to be settled and payments are secured by sovereign guarantees, hence no expected credit loss impairment has been recognised.

Ageing of overdue trade receivables at year-end was as follows:

NOK million	Overdue				Total
	Less than 30 days	30 - 60 days	60 - 90 days	More than 90 days	
2023	23	11	35	16	86
2022	14	10	11	71	105

Note 17 Other non-current and current assets

Other non-current assets

NOK million	2023	2022
Other non-current investments	154	125
Other non-current receivables	112	116
Total other non-current assets	265	241

Other current assets

NOK million	2023	2022
Prepayments related to assets under development/construction	635	1336
Receivables from public authorities/prepaid taxes, VAT etc	252	235
Other receivables and prepaid expenses	263	292
Total other current assets	1,150	1,862

Prepayments related to assets under development and construction

The prepayments relate to upfront payment of project costs on the construction projects in South Africa and Pakistan.

Note 18 Other non-current and current liabilities

Other non-current liabilities comprise the following:

NOK million	2023	2022
Shareholder loan from co-investors (ref Note 25)	428	708
Non-current lease liability (ref Note 12)	315	270
Asset retirement obligations (ref Note 10)	490	475
Other long-term liabilities and accruals	110	165
Total other non-current liabilities	1,343	1,618

Other current liabilities comprise the following:

NOK million	2023	2022
Accrued expenses related to assets under development/construction	1,400	237
Public dues other than income taxes	89	76
Accrued interest expenses	-	112
Accrued payroll	74	75
Current lease liability (ref Note 12)	25	43
Deferred income	14	106
Other current liabilities and accruals	459	457
Total other current liabilities	2,060	1,106

Accrued expenses related to assets under development/construction

Accrued expenses relate to accrual of project costs on the construction projects in South Africa and Pakistan.

Asset retirement obligations are provided for in case where the Group has a legal obligation to dismantle and remove a power plant and restore the site on which it is located at a future date. The estimate for the asset retirement cost is capitalised as part of the carrying value of the power plant and depreciated over the useful life. The estimate is reassessed annually for each power plant, based on updates in assumptions and key input data.

Movement in asset retirement obligations

NOK million	2023	2022
Asset retirement obligation at 1 January	475	270
Additional provision during the year	35	189
Provisions reversed during the year	-52	-
Unwinding of discount	25	18
Effect of movement in foreign exchange and other changes	6	-1
Asset retirement obligation at 31 December	490	475

Note 19 Legal disputes and contingencies

Estimation uncertainty

The Group is operating in various jurisdictions and is subject to legal disputes and regulatory reviews. Management applies assumptions and judgement considering all information available when assessing if unfavourable outcomes are probable and when estimating amounts required to settle any obligation. Legal claims are assessed on an individual basis and provisions are recognised if the specific claims give rise to present, probable obligations and the costs can be reliably measured. The most significant claims are summarised below.

Significant disputes and uncertain tax positions

The joint ventures in the Philippines are subject to tax reviews by the local tax authorities on a regular basis, and one entity received a final assessment notice related to the year 2019 of

NOK 183 million equivalent (at 31 December 2023) in March 2022. The matter is disputed, and the amount is not included in net income from JV and associated companies for the year.

The joint venture in Uganda is subject to a tax investigation by a local tax authority and received tax claims in total amount of NOK 308 million equivalent (at 31 December 2023) on Scatec's proportionate share during the third quarter 2023. The matter is disputed, and the amount is not included in net income from JVs and associated companies for the year. If the claims materialise, the joint venture will claim this through the tariff according to the Power Purchase Agreement. Should this be challenged the JV has certain indemnities under the Power Purchase Agreement with the off-taker. Further, Scatec has certain tax indemnities under the SN Power share purchase agreement with Norfund.

Note 20 Financial risk management

Through its business activities Scatec is exposed to the following financial risks:

- Market risk (including commodity price risk, currency risk and interest rate risk)
- Liquidity risk
- Credit risk

Guidelines for risk management have been approved by the Board of Directors and are carried out by Scatec's group finance department in cooperation with the individual operational units.

Market risk

Scatec is exposed to various market risks, including fluctuations in commodity prices, foreign currency rates and interest rates that can affect the revenues and costs of operating, investing and financing activities.

Commodity price risk

Scatec's sale of electricity constitute a material share of its revenues. As a result, the Group's business, financial position, results of operation and cash flow are affected by changes in electricity prices. The Group seeks to reduce the effect of price fluctuation by entering into long term, fixed price contracts. The power plants produce electricity primarily sold under long term bilateral power purchase agreements (PPAs), with state owned utilities or corporate off-takers, or under government-based feed-in tariff schemes. The weighted average remaining PPA duration for power plants in operation is 15 years. The electricity produced from the power plants in the Philippines is sold in the spot market and on bilateral contracts under a renewable operating license, as well as ancillary services. In June 2023, Scatec started selling power from the Progressovka power plant in the spot market. The decision to sell into the

spot market was made based on changes in the local law which enabled Scatec to pause the PPA (while still being able to re-enter the PPA).

Some of the off-take agreements entered into do not contain inflation-based price increase provisions or provisions that only partially allow for inflation-based increases. Some of the countries in which the Company operates, or into which the Company may expand in the future, have in the past experienced high inflation. The fixed price contracts are classified as "own use" contracts (with reference to IFRS 9.2.4), and hence not considered to be in scope of IFRS 9.

A decline in the market price of electricity could materially adversely affect the financial attractiveness of new projects. The price of electricity is influenced by government support schemes, the development of the renewable power production industry and development in prices on other sources of electricity.

Transitional climate risk including broader regulatory changes, development in cost and efficiency of renewable energy technologies and changes in power markets are expected to affect power prices. Changes to energy trading, allocation of transmission cost and grid capacity, could also have an impact on electricity prices.

A decline in the costs of other sources of electricity and primary energy sources, such as fossil fuel or nuclear power, could reduce the wholesale price of electricity. A significant amount of new electricity generation capacity becoming available could also reduce the wholesale price of electricity.

Currency risk

Scatec operates internationally and is subject to currency exposure when transactions and monetary balances are denominated in currencies other than the functional currency. For the Group's operating entities, currency risk is managed based on functional currency and expected cash flows. This is done through the setup of the SPVs with natural hedges where non-recourse financing, revenue and other transactions to a large extent are denominated in the same currency. Construction revenues, cost of sales and gross profit may be subject to significant currency fluctuations. However, multi-currency construction contracts contribute to a natural hedge of cost of sales. To the extent that the Group hedges foreign currency exposure, it is based on cash flow considerations and not with regards to foreign currency translation effects in the financial statements.

The Group is also exposed to currency fluctuations with regards to dividend distributions from the operating

companies and dividend payment to the shareholders of the parent company. The general policy of the Group is not to hedge foreign currency exposure on distributions from the companies operating the power plants.

The sensitivity analysis shows the profit and loss effect of reevaluation of monetary items due to changes in currencies the Group is exposed to. See consolidated statement of other comprehensive income for foreign currency translation affecting equity. The sensitivities have been calculated based on what Scatec views to be reasonably possible changes in the foreign exchange rates for the coming year and net balances in different currencies as of December 31, 2023. The tables show profit and loss effect of 5 % increase in the currency rate against NOK.

NOK million	Profit (loss) before taxes
At 31 December 2023	
EUR - Net gain/(loss) (5%)	-63
USD - Net gain/(loss) (5%)	-3
ZAR - Net gain/(loss) (5%)	-25
MYR - Net gain/(loss) (5%)	-6
EGP - Net gain/(loss) (5%)	-7
UAH - Net gain/(loss) (5%)	-24
PKR - Net gain/(loss) (5%)	-20

NOK million	Profit (loss) before taxes
At 31 December 2022	
EUR - Net gain/(loss) (5%)	-45
USD - Net gain/(loss) (5%)	3
BRL - Net gain/(loss) (5%)	-4
ZAR - Net gain/(loss) (5%)	-13
MYR - Net gain/(loss) (5%)	-6
EGP - Net gain/(loss) (5%)	-21
UAH - Net gain/(loss) (5%)	-21

Interest rate risk

Scatec is exposed to interest rate risks through funding and cash management activities. The interest rate risk management objective is to keep the borrowing costs at a minimum and to keep the volatility of future interest payments within acceptable limits. The Group manages its interest rate risk by either using long-term financing at fixed rates or using floating to fixed interest rate swaps for either parts or full exposure of external loans.

Based on the current Group interest bearing debt portfolio, the interest rate hedge ratio (weighted average) is approximately 63 % for the non-recourse project level debt. For corporate debt, the hedge ratio has been slightly reduced from approximately 20% to 17% in 2023 due to amortisation on the hedged part of the debt.

The interest rate risk on the debt at the power plant level is predominantly hedged by way of interest rate swaps subject to hedge accounting or fixed rate loans. For more information on the Group's financial liabilities, refer to Note 23 Corporate Financing and Note 24 Non-recourse financing.

The sensitivity analysis shows how profit and loss would have been affected by changes in unhedged interest rates.

NOK million	At 31 December 2023	At 31 December 2022
At 31 December 2023	1%	1%
Net gain/(loss)	-61	-65

The impact on the profit and loss with a decrease or increase in interest rate of 1% would result in a gain or loss of NOK 61 million.

Liquidity risk

Liquidity risk is the risk that Scatec will not be able to meet financial obligations when due. The Group manages liquidity risk through a regular review of future commitments, cash flows from operations and credit facilities. Due to the dynamic

nature of the underlying business, the Group maintains flexibility in funding by maintaining availability under committed credit facilities. In addition, the Group has available funding through the USD 180 million Revolving Credit Facility (RCF) and the USD 5 million Overdraft Facility. As per December 31, 2023, USD 70 million was drawn on the RCF.

In some of the countries where Scatec operates, governments have imposed regulations on repatriation of funds out of the country. This may halt or delay flow of funds between group companies under certain circumstances. Scatec seeks to minimise such risk through assessments of the relevant jurisdictions and regulations and adapt accordingly.

Scatec's ability to seek liquidity and comply with financial obligations is related to the capability to comply with extended ESG targets and reporting requirements. Transitional climate risk including new regulations and shifting in global financing may affect Scatec's liquidity.

A break-down of free and restricted cash is provided in Note 15 Cash and cash equivalents.

Maturity of principal payment and interest on financial liabilities held by the Group

NOK million	Within 1 year	1-2 years	2-5 years	More than 5 years
Corporate financing	1,564	4,600	5,612	-
Non-recourse financing	2,596	2,455	7,091	20,717
Shareholder loan from non-controlling interests	30	12	168	370
Trade and other interest-bearing liabilities	294	247	-	-
Lease liabilities	47	62	112	278
Total	4,531	7,376	12,983	21,365

For information about the Group's financial liabilities including maturity, refer to Note 23 Corporate Financing, Note 24 Non-recourse financing, Note 26 Guarantees and Note 12 Leases

Credit risk

Credit risk is the risk that Scatec's customers or counterparties will cause financial loss by failing to meet their obligations. The Group is exposed to third party credit risk in several instances, including off-take partners who have committed to buy electricity produced by or on behalf of the Group, suppliers and/or contractors who are engaged to construct or operate assets held by the Group, property owners who are leasing land to the Group, banks providing financing and guarantees of the obligations of other parties, insurance companies providing coverage against various risks applicable to the Group's assets, and other third parties who may have obligations towards the Group.

Most of the electric power generated by the Group's current portfolio of projects in operation or under construction is, or will be, sold under long-term off-take agreements with public utilities or other partners, or under Feed-in Tariff ("FIT") arrangements, Power Purchase Agreements (PPAs) or similar support mechanisms governed by law. The majority of these projects is supported by government guarantees or have obligations regulated by law. However, there is still a risk of legislative or other political action that may impair their contractual performance.

The energy produced in the Philippines is sold to the whole sale market. Energy produced by the Progressovka plant in Ukraine is delivering to the spot market, but retaining the option to re-enter the PPA. For any reason, if any of the counterparties to these contracts are unable or unwilling to fulfil their contractual obligations, refuse to accept delivery of

power delivered thereunder or if they otherwise terminate such agreements prior to the expiration thereof, our assets, liabilities, business, financial condition, results of operations and cash flows could be materially and adversely affected.

The Group's main credit risks arise from credit exposures with accounts receivables and deposits with financial institutions. All major deposits and investments with financial institutions are kept with entities carrying a minimum international credit rating from Moodys/ S&P of at least A-.

Theoretically, the Group's maximum credit exposure for financial assets is the aggregated statement of financial position carrying amounts of financial loans and receivables before expected credit loss provision, as well as cash and cash equivalents, equaling NOK 5,020 million at 31 December 2023.

Refer to Note 16 Trade receivables for information on the expected credit loss provision related to trade receivables.

Note 21 Financial instruments

Accounting principle

Financial assets

The classification of financial assets depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them.

The Group's financial assets at amortised cost mainly include trade receivables and cash and cash equivalents. Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment assessment. See note 16 for accounting policy and ECL approach on trade receivables.

Financial assets at fair value through profit or loss include derivatives, including separated embedded derivatives, unless they are designated as effective hedging instruments. The Group's financial assets at fair value through OCI include effective cash flow hedges.

Financial liabilities

All financial liabilities are initially recognised at fair value, in the case of loans, borrowings and payables, net of directly attributable transaction costs. The Group's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts and derivative financial instruments.

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. The EIR amortisation is included as finance costs in the statement of profit or loss. The Group's financial liabilities at fair value through OCI include effective cash flow hedges.

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires.

Estimation uncertainty

Fair value measurement

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy from IFRS 13 based on the lowest level input that is significant to the fair value measurement.

The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on the observable yield curves (level 2). The fair value of a foreign exchange derivatives are calculated as the present value of the difference between the fixed forward rate and the spot rate at the balance sheet date (level 2). During the reporting period ending 31 December 2023, there have been no transfers between the fair value levels. Refer to Note 22 Derivative financial instruments for details.

Financial instrument by measurement category

NOK million	Measurement category	2023	2022
Assets			
Derivatives			
Interest rate swap	Fair value – hedging instruments through OCI	315	396

Reclassified to equity	-	-	-	-
Foreign exchange movements	324	903	80	1,049
Liability at 31 Desember 2023	9,079	7,987	16,957	15,260

Refer Note 12 Lease for movement in lease liabilities.

Note 22 Derivative financial instruments

Derivatives

The Group uses derivative financial instruments to hedge certain risk exposures. Derivative financial instruments entered into include:

- receive fixed, pay variable interest rate swaps to hedge the interest rate risks related to non-recourse financing of renewable power production plants and for parts of the corporate debt
- cross-currency interest rate swap to hedge corporate debt denominated in NOK where the principal amount in NOK is swapped to USD and reference rate is swapped from NIBOR to SOFR to hedge the risk of fluctuations in the USD/NOK exchange rate and the underlying interest rates
- foreign exchange derivative contracts to hedge the risk related to financing and CAPEX denominated in local currencies for projects under construction

Hedge accounting

Interest rate swaps and cross-currency interest rate swap

Derivative financial instruments are initially recognised at fair value on the date of which a derivative contract is entered into and are subsequently re-measured at fair value. The effective portion of cash flow hedges is recognised in OCI and later reclassified to profit or loss when the underlying hedged item affects profit or loss.

Derivative financial assets and liabilities

The tables show the market value of the derivatives for the year ending 2023 and 2022, carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. The derivative financial instruments are presented on a gross basis in the consolidated statement of financial position, since the Group did not have the legal right to offset these cash flows.

NOK million	2023	2022
Interest rate swap contracts financial assets measured at level 2 in the fair value hierarchy		
Current portion	16	21
Non-current portion	299	375
Total derivative financial assets	315	396

NOK million	2023	2022
Interest rate swap contracts financial liabilities measured at level 2 in the fair value hierarchy		
Current portion	7	16
Non-current portion	172	12
Total Interest rate swap contracts derivative financial liabilities	179	28
Foreign exchange contracts financial liabilities measured at level 2 in the fair value hierarchy		
Current portion	34	92
Non-current portion	7	0
Total Foreign exchange contracts financial liabilities	41	92
Total derivative financial liabilities	219	120

The Group only applies hedge accounting for cash flow hedges that meet the criteria in IFRS 9. This include the interest rate swaps and the cross-currency interest rate swaps. Such hedges are expected to be highly effective in achieving offsetting changes in the expected cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Foreign exchange derivatives

Foreign exchange derivatives consist of USD/ZAR currency forward contracts related to the power plants under construction in South Africa, to mitigate currency exposure on equipment purchases denominated in USD. The foreign exchange derivatives are recognized in the statement of financial position at fair value, with the change in value recognized in the statement of profit and loss as financial income/expense.

Hedge accounting is applied for hedges entered into during the year, and the effective portion of cash flow hedges is then recognised in OCI and later reclassified to profit or loss when the underlying hedged item affects profit or loss.

Interest rate swaps per country 2023

Country	Notional amount (NOK million)	Fixed rate(s)	Floating rate reference rate(s)	Maturity
Norway	1,374	0.40%	3-month USD LIBOR	2025
South Africa	3,308	8.40% - 9.78%	3-month JIBAR, 1-month JIBAR	2031-2041
Egypt	2,369	2.15%	USD-SOFR-COMPOUND	2041
Malaysia	191	2.95%	6-month KLIBOR	2028

Interest rate swaps per country 2022

Country	Notional amount (NOK million)	Fixed rate(s)	Floating rate reference rate(s)	Maturity
Norway	1,457	0.40%	3-month USD LIBOR	2025
South Africa	2,197	8.40% - 8.70%	3-month JIBAR	2024-2028

Of which equity holders of the parent company	34	199

Note 23 Financing

Corporate financing

The table below gives an overview of the corporate financing carried out by the Group. The loan balances include the non-current and current portion.

The book equity of the recourse group, as defined in the facility agreements, was NOK 10 393 million on 31 December 2023. Scatec was in compliance with financial covenants for recourse debt at year end.

The listed EUR Green Bond has a coupon rate of 3M EURIBOR + 2.5 % margin. The USD 150 million Green Term Loan is amortised through semi-annual repayments of USD 7.5 million.

Refinancing of Bridge to Bond facility

In the first quarter of 2023, Scatec fully refinanced the USD 193 million Bridge-to-Bond facility related to the acquisition of SN Power. On 2 February 2023, Scatec refinanced USD 100 million of the USD 193 million Bridge-to-Bond facility with a new USD 100

million Green Term Loan with maturity in the fourth quarter 2027 provided by DNB, Nordea and Swedbank. The new Term loan is amortised through semi-annual repayments of USD 5 million starting from 2024.

On 10 February 2023 Scatec ASA issued NOK 1 billion of new senior unsecured green bonds to refinance the remaining USD 93 million of the Bridge-to-Bond facility. Interests will be paid on a quarterly basis, with no repayments of principal before maturity. The new bonds have maturity in February 2027 with a coupon rate of 3m NIBOR + 660 bps. With the new bond, Scatec ASA has entered into a cross-currency interest rate swap contract in which the principal of NOK 1 billion was swapped to USD 97.5 million, and interest payments based on NIBOR rates are swapped to SOFR-based rates.

Refer to Note 32 Subsequent Events for information about refinancing and issuance of new bond after year end.

	Currency	Denominated currency value (million)	Maturity	Carrying value 31 December 2023 (NOK million)	Carrying value 31 December 2022 (NOK million)

1) Accrued interest has been reclassified from Other current liabilities to Corporate financing in the statement of financial position in 2023.

Outstanding acquisition finance

As of 31 December 2023, the following facilities and amounts are outstanding of the initial USD 1,030 million financing package related to the acquisition of SN Power in the first quarter of 2021:

- USD 150 million Green Term Loan provided by Nordea, Swedbank and DNB with maturity in the first quarter of 2025. Refer to note 32 Subsequent Events for information about refinancing of the Green Term Loan.
- USD 200 million Vendor Financing provided by Norfund with maturity in the first quarter of 2028.

Revolving credit facility

The existing USD 180 million Revolving Credit Facility (RCF), provided by Nordea Bank, DNB, Swedbank and BNP Paribas, was in the first quarter further extended by 1.5 years with maturity in the third quarter of 2025. The facility can be drawn in USD, NOK, EUR or an optional currency agreed with the banks. Any drawdown on the RCF is required to be repaid after 12 months. Scatec made a drawdown on the facility in the fourth quarter and USD 70 million was outstanding at year-end 2023, increasing free cash to NOK 977 million.

The margin on the RCF is linked to the following ESG (Environmental, Social and Governance) KPIs:

- A targeted level for LTIFR (Lost time incident frequency rate) for the Group
- Anti-Corruption training for all employees
- Environmental and social baseline studies and risk assessment on all power plants by external experts

Overdraft facility

Scatec has not drawn on the overdraft facility with Nordea per 31 December 2023. Per 31 December 2023, Scatec was in compliance with all financial covenants for the above facilities.

Guarantee facilities

The Guarantee Facility Agreement (GFA) has Nordea Bank as agent and issuer, with Nordea Bank, Swedbank, DNB and BNP Paribas as guarantee instrument lenders. The GFA is mainly used to provide advance payment-, performance and warranty bonds under construction agreements, as well as trade letter of credits. In addition to the GFA, Scatec has guarantee facilities with Standard Bank South Africa, Lombard insurance company in South Africa, First Randbank in South Africa, four European insurance companies providing sureties and MBank in Malaysia. These facilities are mostly used to cover short term bid bonds. Refer to 26 Guarantees and commitments for further information.

Other interest-bearing liabilities

PowerChina Guizhou Engineering Co ("PowerChina") have provided a construction loan to Scatec for the Progressovska power plant in Ukraine. Scatec has provided a corporate and bank guarantee to PowerChina in support of this obligation. In 2022, Scatec and PowerChina signed a revised payment plan for the construction loan where part of the loan was paid in August 2022 and December 2023. The last tranche of EUR 22 million, equivalent to NOK 247 million at year-end 2023, will be paid by mid-2025.

Scatec has no other recourse construction financing arrangements for other projects. Refer to Note 26 Guarantees and commitments for further details.

Note 24 Non-recourse financing

See Note 21 Financial instruments for accounting principle for financial liabilities recognised to amortised cost.

The table below specifies non-recourse financing as of 31 December 2023 and 2022. The rate of interest is a calculated

average per portfolio. Most of the loans are fixed or swapped to fixed rate interests. For more information on interest rate risk, see Note 20 Financial Risk Management.

NOK million	Interest rate	Maturity date	2023	2022

Of which current non-recourse financial liabilities			1,931	1,963

1) Rwanda is presented as held for sale and the total group loan balance does not include outstanding non-recursing finance balance in Rwanda at the end of 2023

The financing of the plants is mainly ring-fenced in power plant companies with a non-recourse finance structure. This implies that the project debt is only secured and serviced by project assets and the cash flows generated by the project. Compared to corporate financing, non-recourse financing has certain key advantages, including a clearly defined and limited risk profile. There is no obligation for project equity investors to contribute additional funding in the event of a default.

Free cash flows after debt service are distributed from these power plant companies to Scatec, and any other project equity investors in accordance with the shareholding and the terms of the finance documents.

For four of the five companies operating in the Czech Republic, the non-recourse financing agreements include a cross-default clause within the Czech group.

Please refer to Note 26 Guarantees and commitments for information on the use of parent company guarantees in favor of power plant companies.

The project entities' assets are pledged as security for the non-recourse financing. The Group's book value of the pledged power plants is NOK 20,710 million (15,676) as of 31 December 2023.

Repayment structure

NOK million	Loan repayment	Interest payment	Total

Covenants

Scatec has financial covenants related to the non-recourse financing in the different countries, for example different Debt Service Coverage Ratios (DSCR) and Equity Ratios. The agreements also contain restrictions on, inter alia, hedging policies, new activities and consents, amendments to the key agreements and insurance policies, pledges and guarantees, financial indebtedness and giving financial support, capital expenditures, changes of shareholder structure and auditors, as well as several undertakings related to budgets, financial and operational reporting.

Except for Ukraine, Scatec was in compliance with financial covenants for the non-recourse debt on 31 December 2023.

Ukraine

The current non-recourse debt as of 31 December 2023 includes NOK 865 million in non-recourse debt in Ukraine. All of Scatec's power plant companies in Ukraine with non-recourse financing are in breach with several covenants in the loan agreements as of 2023. Scatec has continuous and constructive dialogue with the lenders and the parties have agreed on a non-formalised "stand still".

Egypt

Scatec has a non-recourse Green Project Bond in Egypt with an outstanding balance of USD 302 million per 31 December 2023. Due to the recent economic development, Egypt is facing a shortage in foreign currencies including USD. By the end of 2023, the subsidiaries in Egypt exchanged material deposits in local currency to USD (USD 42 million) at the official exchange rate and refilled the Debt Service Reserve Accounts with the required amounts for the non-recourse Green Project Bond. The project companies hold sufficient USD to serve the next installment of the bond due in March 2024 of approximately USD 18 million. The uncertain macro situation and difficulties of exchanging EGP to USD is expected to persist and is closely monitored by the group. Refer to Note 32 Subsequent events for further information.

Note 25 Project financing provided by co-investors

In relation to the structuring and financing of the power plant companies in the Group, financial instruments are issued to both the controlling and non-controlling interests. Such financing can be both paid-in equity and shareholder loans. Issued capital and shareholder loans are considered equity instruments if repayment is on the discretion of the power plant company.

The equity and loan financing provided by the co-investors is repaid according to a pre-determined waterfall structure,

meaning that the financing presented below will be settled after external non-recourse financing, and only when distributable cash as defined by the financing agreements is available. Normally this would occur twice a year.

For some of the project companies in the table the co-investor funding has been provided indirectly through jointly owned holding companies.

At 31 December 2023, the following financing have been granted by co-investors to consolidated power plant companies:

NOK million	Country of incorporation	Total financing	Paid-in equity	Shareholder loan recognized

For the year 2023, interest expenses on financing from co-investors of NOK 45 million have been expensed (NOK 45 million for 2022), of which NOK 2 million is recognised directly in equity (NOK 2 million for 2022).

Note 26 Guarantees and commitments

Guarantee exposure

The amounts specified below are total exposure on guarantees issued by Scatec ASA at each balance sheet date based on when the guarantees expire. The guarantees expire randomly during the year. Most guarantees are issued on behalf of consolidated entities, except as specified in the table below. The fair value of the guarantees is immaterial on a consolidated basis; hence no liability is recognised.

NOK million	31.12.2023	31.12.2024	31.12.2025	31.12.2026
Bid Bonds	66	44	44	44
Advanced Payment Guarantees	31	-	-	-
Performance Guarantees (EPC)	289	249	-	-
Warranty Guarantees (EPC)	621	359	359	-
SPV Performance / Commitments	625	537	228	149
O&M Performance (3rd Party)	19	-	-	-
Other Payment Guarantees	2,083	274	9	9
Total	3,734	1,462	640	201
Whereof issued on behalf of non-consolidated entities	108	36	-	-

Guarantees

For projects under development, Scatec is often required to issue Bid Bonds to secure commitment during submission of project bids.

Performance Guarantees cover contractual obligations under the construction phase and typically represents 10%-15% of the contract value. Warranty Guarantees represent typically 2.5%-5% of the contract value and are issued to cover potential shortfall of operational performance for the first two years of operation.

SPV Performance and Commitment Guarantees are issued to cover some obligations under PPAs and Implementation Agreements. These obligations are connected to project performance where Scatec is in control and hold the O&M and the asset management agreements. In addition, this includes the payment guarantee to PowerChina for the construction loan on the Progressovska solar plant in Ukraine.

In addition, Scatec provides Other Payment Guarantees. This includes security for equity injection in project companies during construction where project lenders disburse debt

before equity is paid in and Debt Service Reserve to replace cash reserves in the project companies.

Guarantee Facilities

The guarantees issued by Scatec ASA are issued under the Guarantee Facility Agreement (GFA) with Nordea Bank as agent, and Nordea Bank, BNP Paribas, Swedbank and DNB as guarantee instrument lenders.

Export Finance Norway (Eksfin) normally cover the guarantees issued under the GFA. Eksfin can issue counter indemnity of 50% in favor of the issuing banks. The financial covenants in the GFA are:

- Free cash of no less than NOK 150,000,000
- Debt to capitalization ratio 50%
- Minimum interest coverage ratio 3.0x

Per 31 December 2023, Scatec was in compliance with all covenants in the GFA. In addition, Scatec ASA has guarantee facilities with State Bank of South Africa (SBSA), First Randbank (RMB) in South Africa and Botswana and five insurance companies.

Note 27 Share capital, shareholder information and dividend

Share capital and shareholder information

At year-end 2023 the total number of shareholders in Scatec was 14,846 (16,463). The total number of outstanding shares was 158,917,275 (158,917,275) at par value NOK 0.025 per share as of 31 December 2023.

No leading employees have exercised any share options during the year and no employee share purchase program was carried out, leading to no increase in share capital during the year.

Refer to Note 12 – Equity and shareholder information in the Parent financial statement for an overview of the largest shareholders of Scatec ASA and shares held by Management and Board of Directors at 31 December 2023.

Refer to Note 4 – Employee benefits for information on share options granted to the management.

Dividend

The Company recognises a liability to make cash or non-cash distributions to equity holders of the parent when the

distribution is authorised, and the distribution is no longer at the discretion of the Company. As per the corporate laws in Norway, a distribution is authorised when it is approved by the General Meeting.

In the fourth quarter of 2022, Scatec announced that the Board of Directors (BoD) had decided to change the dividend policy from 25% to 15% of cash distributions received from operating power plants. It was further stated that the dividend policy would be assessed annually by the BoD based on Scatec's capital situation. Given the current macro-economic and capital market situation the BoD approved in the fourth quarter 2023 to change the dividend policy to no dividend. The dividend policy will be assessed annually by the board based on Scatec's capital situation.

On 2 February 2023, the Board of Directors announced its intention to propose a dividend of NOK 1.94 per share to the Annual General Meeting, totaling NOK 308 million. The amount was paid out in May 2023.

Note 28 Consolidated subsidiaries

The consolidated financial statement of Scatec comprises more than 200 legal companies that are controlled by Scatec ASA.

The following table include material consolidated subsidiaries, including material holding companies. Consolidated economic interests correspond to the voting interests if not otherwise

stated. For subsidiaries of the ultimate Parent's subsidiaries, the economic interests stated is the mathematically indirect consolidated economic interests. For information on associated companies and joint venture companies, refer to Note 14 Investments in JV and associated companies.

¹⁾ The consolidated economic interest in the Malaysian project companies represents Scatec's share of the contributed equity and retained earnings in the project companies as of the reporting date. Scatec's average economic interest through the PPA tenor is estimated to be 95% based on the Group's right to economic return obtained through shareholdings and other contractual arrangements. The average economic interest may be subject to change.

Note 29 Non-controlling interests

Non-controlling interests

Scatec's value chain comprises all downstream activities such as project development, financing, construction, operations as well as having an asset management role through ownership of the solar power plants. Normally Scatec enters into partnerships for the shareholding of the power plant company owning the power plants while maintaining control, leading to material non-controlling interest.

Consolidation of power plant companies is identified as a significant judgement for the consolidated financial statements, please refer to Note 2 for further information.

Note 28 Consolidated subsidiaries include all material entities with a NCI share. The NCI share is the share of interest not owned by Scatec.

Accumulated balances of non-controlling interest and the allocation of profit and loss are presented below by sub-group. The change in NCI balance from year to year is driven by the NCIs share of profit or loss and other comprehensive income, capital injections from and dividends paid to NCIs, as well as foreign exchange differences.

Accounting principle

Non-controlling interests are calculated on the respective subsidiaries' stand-alone reporting, before eliminations of

intercompany transactions. Furthermore, unrealised intercompany profits relating to depreciable assets (power plants) are viewed as being realised gradually over the remaining economic life of the asset. Consequently, the specification of non-controlling interest in the Group financial statements will

differ from the non-controlling interests calculated based on the respective subsidiaries' stand-alone reporting.

Total balances of material non-controlling interest

Note 30 Transactions with related parties

Related parties include affiliates, associates, joint ventures, and other companies where the Group have significant influence, as well as the Executive Management and the Board of Directors. All related party transactions have been carried out as part of the normal course of business and at arm's length terms.

See Note 28 for information about consolidated subsidiaries. Intercompany balances and transactions between consolidated companies are eliminated in the consolidated accounts. No significant impairment is booked for expected credit loss on intercompany receivables within the group.

See Note 14 Investments in JV and associated companies for overview of the companies included and further information about the investments. Transactions with joint ventures and associates are primarily financing provided to the companies and dividends received from the companies. Transactions also include sale of development rights, asset management and OM services from consolidated entities to equity consolidated entities.

See Note 16 Guarantees, contractual obligations and contingent liabilities in the Parent financial statement for overview of guarantees provided by Scatec ASA to group companies.

For remuneration to Management including information about the share purchase program, see Note 4 Employee benefits and further details in Note 4 - Personnel expenses in the Parent financial statement. The Note also includes remuneration to Board of Directors. Scatec has loans to Executive Management given in relation to the long-term incentive programme amounting to NOK 0.2 million (0.2) as of 31 December 2023.

Note 31 Change in accounting policies

Change in accounting policy for external revenues and cost of sales in Power Production segment

The Group has re-assessed its accounting policy for the presentation of external revenues and cost of sales in the proportionate financials. The change is motivated by changes in management internal reporting of revenue from the hydropower companies in the Philippines. The power market settlement mechanism in the Philippines is net for all power sales and purchases within the reporting period, although all volumes are reported gross. The Group previously accounted for such external revenues and cost of sales on a gross basis in accordance with reported volumes. Going forward the Group will present the figures net in accordance with the financial settlement mechanism. The change has no impact on gross profit or EBITDA. The Group believes that net presentation provides more relevant information to the users of the proportionate financials as it reduces the fluctuations in external revenues reported in the Philippines and is more aligned to the practices adopted by peers. The Group has applied the change retrospectively to the proportionate financials. The change is not applicable to the consolidated financials as the investments in the Philippine JVs are accounted for using the equity method. On 1 January 2023, the Group elected to voluntarily change the method of accounting for external revenues and cost of sales in the proportionate financials. Comparative figures for proportionate revenues in 2022 have been restated as follows:

Proportionate financials - NOK million	Reported FY 2022	Adjustment	Adjusted FY 2022
External revenues - Power Production	4,513	-824	3,689
Cost of sales - Power Production	-852	824	-28
EBITDA	2,835	-	2,835

New standards and interpretations

The Group has early adopted amendments to IAS 1 and IFRS Practice Statement 2 in 2022 comprising accounting policy information. The material accounting principles in the Annual report are largely incorporated into the individual notes.

The Group has not elected to early adopt amendments to IAS 1 *Presentation of Financial Statements* effective from 1 January 2024. Amendments to requirements related to classification of non-current and current liabilities with covenants is not expected to affect the classification of any liabilities in the Group's financial statements in 2023. The amendments require an entity to provide disclosures related to liabilities with covenants, including information about the covenants, and risk of non-compliance. The amendments will require additional note disclosures related to the corporate debt and non-recourse project debt. Scatec will comply with the new regulations from 2024.

The Group has not elected to early adopt amendments to IAS 7 *Statement of cash flow* and IFRS 7 *Financial instruments: Disclosures* effective from 1 January 2024. The amendments clarify the characteristics of supplier finance arrangement and include amendments to required note disclosures on the impact on the entity of such arrangements. The amendments may be relevant for credit facilities held during the construction phases.

The Group has not elected to early adopt Amendments to IAS 21 *The effects of changes in foreign exchange rates* effective from 1 January 2025. The amendments specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments may be relevant for certain jurisdictions where Scatec operates and holds balances in local currencies.

Note 32 Subsequent events

Adjusting subsequent events

No adjusting events have occurred after the balance sheet date.

Non-adjusting subsequent event

In line with the terms adopted by the Annual General Meeting of Scatec ASA in 2023, the Board of Directors continue the share-based incentive programme for leading employees of the company, following the same principles as previous years. On January 3, 2024, a total of 1,515,885 share options were granted to leading employees. Each share option gives the right to subscribe for and be allotted one share in Scatec ASA. The strike price of the options is set to NOK 79.47 per share based on the volume weighted average share price over the ten last trading days preceding the grant date of 3 January 2024. The options will lapse if not exercised by 1 January 2028. The option grant is divided into three tranches whereby 1/3 vests each year over three years, with the first tranche vesting 1 January 2025. The current grant is the second of three contemplated annual grants of share options in accordance with Scatec's share-based incentive programme.

On January 25, 2024, Scatec ASA agreed refinancing terms with DNB, Nordea and Swedbank for its USD 150 million green term loan, with USD 135 million outstanding at the end of the fourth quarter 2023. The new green term loan will be amortised through semi-annual repayments of USD 7.5 million with final maturity in the fourth quarter 2027.

On January 31, 2024, Scatec ASA announced the issuance of a NOK 1,750 million 4-year senior unsecured bond with a coupon of 3 months NIBOR + 4.25% p.a. with quarterly interest payments. DNB Markets, Nordea and SpareBank 1 Markets acted as Joint Lead Managers in connection with the placement of the new bond issue. An application was made for the bonds to be listed on Oslo Stock Exchange. On February 1, 2024, Scatec ASA announced buy-back of EUR 136 million of outstanding bonds with ticker "SCATC03 ESG" (ISIN NO0010931181) which will be cancelled subsequently. Following the transaction, the total nominal outstanding amount is EUR 114 million. The remaining proceeds from the NOK 1,750 million bond issue after the buy-back will be applied towards eligible activities as set out in the Green Financing Framework, including additional repayment of corporate debt.

Reference is made to previous communication around changes to the PPA in Honduras. In May 2022, a new Energy law came into force as introduced by the new Government of Honduras. Per January 31, 2024, a PPA amendment agreement was signed between Scatec's operating entities in Honduras and the offtaker ENEE. The key changes to the PPA include a lower tariff, extension of the PPA with five more years and a compensation amount to be paid by the off taker to Scatec's operating entities. In total, the amendments to the PPA in combination with the compensation amount are not expected to have a material adverse effect of the financials of the projects.

On March 6, 2024, the central bank in Egypt announced a full free floating of the local currency, Egyptian Pound (EGP), and the local currency devaluated against USD. Scatec's Benban plants in Egypt are operating under a 25-year Power Purchase Agreement with the Egyptian Electricity Transmission Company, S.A.E, which started operations in 2019. The tariff in the Power Purchase Agreement is denominated in USD but paid in EGP. 30% of the production volume is invoiced in EGP at a fixed rate to USD of 8.88, while 70% of the revenues are invoiced at the official EGP/USD spot rate for the relevant period. Due to devaluations of the EGP since the operations commenced, the fixed-rate part of the revenues constituted approximately NOK 30 million in 2023 representing 10% of Scatec's total proportionate power production revenues in Egypt. This part of the revenues is exposed to further devaluation of the EGP. The non-recourse debt is dominated in USD and not impacted by the devaluation, while Scatec's cash balances in EGP is negatively impacted by a devaluation. The change of the central bank's strategy in Egypt is expected to ease the convertibility of EGP to USD. Please refer to Note 15 Cash and cash equivalent for information on cash balances in Egypt at year-end 2023.

Notes to the parent company financial statements

Note 1 General information

Scatec ASA is incorporated and domiciled in Norway. The address of its registered office is Askekroken 11, NO-0277 OSLO, Norway. Scatec was established on 2 February 2007.

Scatec ASA ("the Company"), its subsidiaries and investments in associated companies and joint ventures ("the Group" or "Scatec") is a leading renewable power producer, delivering affordable and clean energy worldwide. As a long-term player,

Scatec develops, builds, owns and operates solar, wind and hydro power plants and storage solutions.

The Company is listed on the Oslo Stock Exchange.

The consolidated financial statements for the full year 2023 were authorized for issue in accordance with a resolution by the Board of Directors on 19 March 2024.

Note 2 Accounting principles

Basis for preparation

The financial statements of Scatec ASA are prepared in accordance with the Norwegian Accounting Act of 1998 and Norwegian Generally Accepted Accounting Principles (NGAAP). The financial statements have been prepared on a historical cost basis.

Accounting estimates and judgements

In preparing the financial statements, management has made assumptions and estimates about future events and applied judgements that affect the reported values of assets, liabilities, revenues, expenses, and related disclosures. Therefore, future actual results may differ from current figures.

Foreign currency translation

The functional currency of the Company is US dollar (USD). USD is the currency which primarily affects the financials including corporate financing, income from dividends and revenue from construction activities. The financial statements are presented in NOK. The assets and liabilities are translated into NOK at the rate of exchange prevailing at the end of reporting period and their income statement is translated at average exchange rates. The exchange differences arising on translation are recognised in equity.

Revenues and cost of sales

Scatec ASA develops project rights that are the basis for construction of power plants. Revenues from sale of project rights are recognised upon the transfer of title. Projects in work

in progress are expensed as cost of sale upon the transfer of title or when a project is abandoned and impaired.

Revenues from construction services are based on fixed price contracts and are accounted for using the percentage of completion method. The stage of completion of a contract is determined by actual cost incurred over total estimated costs to complete. Incurred costs include all direct materials, costs for modules, labour, subcontractor costs, and other direct costs related to contract performance.

Scatec ASA periodically revise contract margin estimates and immediately recognises any losses on onerous contracts. Some construction contracts include product warranties. The expected warranty amounts are expensed at the time of sale and are adjusted for subsequent changes in assumptions or actual outcomes.

Further, Scatec ASA derives revenues from the allocation of headquarter costs to its subsidiaries. Revenues from the sale of intercompany services are recognised when the services are delivered.

Employee benefits

Wages, salaries, bonuses, pension and social security contributions, paid annual leave and sick leave are accrued in the period in which the associated services are rendered by employees of the Company. The Company has pension plans for employees that are classified as defined contribution plans. Contributions to defined contribution schemes are recognised

in the statement of profit or loss in the period in which the contribution amounts are earned by the employees.

The Board of Directors has established an option program for leading employees of the company. The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model. That cost is recognised in personnel expenses, together with a corresponding increase in equity over the vesting period.

For further information on accounting principle and share options refer to Note 4 – Employee benefits in the consolidated financials.

For further information refer Note 4 – Personnel expenses, number of employees and auditor's fee.

Interest income and expenses

Interest income and expenses are recognised in the income statement as they accrue, based on the effective interest method.

Income tax expense

Income tax expense comprises current tax and changes in deferred tax. Current tax is the expected tax payable on the taxable income for the year and any adjustment to tax payable in respect of previous years. Deferred tax assets and liabilities are recognised for the future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities and their respective tax bases.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. In order for a deferred tax asset to be recognised based on future taxable profits, convincing evidence is required.

Balance sheet classification

Current assets and liabilities consist of receivables and payables due within one year, as well as project rights. Other balance sheet items are classified as non-current assets and liabilities.

Property, plant and equipment

Property, plant and equipment are stated at cost, less accumulated depreciation and accumulated impairment losses. Property, plant and equipment are depreciated on a straight-line basis over their expected useful life, from the date the assets are taken into use.

Subsidiaries and investment in associated companies

Subsidiaries are entities controlled by Scatec ASA. Subsidiaries and investment in associated companies are accounted for using the cost method and are recognised at cost less impairment. The cost is increased when funds are added through capital increases. Dividends to be received are recognised at the date the dividend is declared by the general meeting of the subsidiary. To the extent that the dividend relates to distribution of results from the period Scatec ASA has owned the subsidiary, it is recognised as income. Dividends which are repayment of invested capital are recognised as a reduction of the investment in the subsidiary.

Inventories

Inventories are measured at the lower of cost and net realisable value. Inventories consist primarily of project assets in various stages of development. Capitalised development costs include legal, consulting, permitting, and other similar costs such as interconnection or transmission upgrade costs as well as directly attributable payroll expenses, travel expenses and other expenses related to developing the project rights.

Scatec reviews project assets for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The Company considers a project commercially viable if it is anticipated to be realised with a margin once it is either fully developed or fully constructed. Scatec considers a partially developed project commercially viable if the anticipated selling price is higher than the carrying value of the related project assets. A number of factors are assessed to determine if the project will be profitable, the most notable is whether there are any changes in environmental, ecological, permitting, or regulatory conditions that impact the project.

Cash and cash equivalents

Cash includes cash in hand and at bank. Cash equivalents are short-term liquid investments that can be immediately converted into a known amount of cash and have a maximum term to maturity of three months. In the statement of cash flows, the overdraft facility is presented gross as part of changes in current liabilities.

Financial liabilities

Interest-bearing borrowings are initially recognised at cost. After initial recognition, such financial liabilities are measured at amortised costs using the effective interest method. Transaction costs are taken into account when calculating amortised cost. Trade payables are carried at cost.

Dividends

On 2 November 2023, the Board of Directors announced its decision to change the dividend policy to no dividend.

Events after the reporting period

New information on the Company's financial position on the end of the reporting period which becomes known after the reporting period, is recorded in the annual accounts. Events

after the reporting period that do not affect the Company's financial position on the end of the reporting period, but which will affect the Company's financial position in the future, are disclosed if significant.

Statement of cash flow

The cash flow statement is prepared using the indirect method.

Note 3 Revenues

Revenue by business area

NOK million	2023	2022

1) Annual fees paid for 2022 and accrued for 2023 respectively.

For more information about remuneration to management, refer to Note 4 Employee benefits in the consolidated financial statement of the Group and the Remuneration Report for 2023.

Audit

NOK million	2023	2022
Audit fees	5	2
Other attestation services	2	-
Tax services	-	2
Other services	-	-
Total	7	4

PwC replaced Ernst & Young as the Company's auditor in 2022. The audit fee for 2022 is related to both former auditor Ernst & Young and current auditor PwC.

VAT is not included in the numbers above.

Note 5 Other operating expenses

NOK million	2023	2022
Facilities	21	27
Professional fees	60	100
IT and communications	42	43
Travel costs	13	11
O&M costs	2	-
Other costs	51	20
Total other operating expenses	189	201

Note 6 Provision for bad debt

The Company has during 2023 recognized NOK 13.3 million in realized bad debt losses on receivables related to discontinued development projects.

No further provision for bad debt has been made as the collection risk of the outstanding receivables is considered low.

Note 7 Financial income and expenses

Interest and other financial income

NOK million	2023	2022
Interest income from group companies	218	156
Other interest income	34	19
Gain/(loss) on sale of financial investments	-	7
Dividend from group companies	140	1,384
Gain from financial investment	-	3
Total interest and other financial income	392	1,570

Interest and other financial expenses

NOK million	2023	2022
External interest expenses	-638	-346
Impairment of financial assets	-	-949
Other financial expenses	-69	-17
Total interest and other financial expenses	-707	-1,311

The write down of financial assets in 2022 is related to Scatec Solar Netherlands BV investments in Ukraine. The write-down is related to both impairment of shares (NOK 341 million) and impairment of receivables to group companies in Ukraine (NOK 607 million). Refer to Note 13 in the consolidated financial statement of the Group for details related to the impairment testing.

During 2023, interest amounting to NOK 638 million (346) was expensed for corporate financing, refer to Note 23 Financing in the consolidated financial statement of the Group for further details. The increase in interest expenses is primarily explained by increase in interest rates.

Note 8 Tax

NOK million	2023	2022
Income tax expense:		
Withholding tax on received dividends	3	21
Change in deferred tax	204	34
Taxes related to previous years	12	13
Total tax expense/(income)	220	68
Tax basis:		
Profit before taxes	-179	-411
Permanent differences ¹⁾	-158	-434
Changes in temporary differences	25	-2
Increase of tax losses carried forward	314	846
Tax base	-	-
Current taxes according to statutory tax rate (22%)	-	-

1) Net permanent differences for 2022 are related to non-taxable dividends partly offset by non-deductible impairment loss on investments and receivables in Ukraine and share based payment expenses.

Reconciliation of nominal statutory tax rate to effective tax rate

NOK million	2023	2022
Expected income tax expense according to statutory tax rate (22%)	-39	-90
Non-taxable expense/ (income)	-36	-85
Allowance for losses carried forward	268	219
Withholding tax on received dividends	3	21
Taxes related to previous years	27	13
Foreign exchange variations between functional and tax currency	-2	-10
Income tax expense/(income)	220	68
	1	
Effective tax rate (%)	122.94%	16.55%

Temporary differences as of 31 December

NOK million	2023	2022	Change
Tax loss carried forward ¹⁾	-2,656	-2,342	314
Other temporary differences	-21	4	25
Total temporary differences	-2,677	-2,338	339
			0
Tax loss carried forward not recognized	2,518	1,301	-1,217
Total temporary differences as basis for recognized tax liability/(asset)	-159	-1,037	-878
Recognised tax liability/(asset)	-35	-226	191

1) Temporary differences are related to tax loss carry forward and disallowed interest deductions carry forward.

The change in deferred tax asset is recognised in tax expense, except for changes which are related to transaction cost from capital increases which are booked directly to equity.

Significant management judgement is required to determine the amount of deferred tax assets that can be recognised based upon the likely timing and the level of future taxable profits. Reference is made to Note 7 in the Consolidated financial statements for the assessment of estimation uncertainty. We assessed the probability of utilising the tax losses to ensure that deferred tax are recognised to

the extent that Scatec ASA expects there will be sufficient future taxable profits available to utilise the losses. The tax losses in Norway can be carried forward indefinitely.

NOK million				
Associates and joint ventures	Office	Ownership	Carrying value 2023	Carrying value 2022
Kube Energy AS	Oslo, Norway	0%	-	2
Release Solar AS	Oslo, Norway	68%	771	-
Total			771	2

In 2023, Scatec ASA signed an agreement to raise capital from Climate Fund Managers ("CFM") to further accelerate its growth ambitions in Release. CFM contributed approx. NOK 560 million in equity for a 32% shareholding in Release Solar AS. Scatec retained the majority shareholding of 68% but the investment is recognized as a joint venture. Release Solar AS is recognized at cost, where Scatec's carrying value as of December 2023 corresponds to the investments made in the company prior to the entry of CFM. Total equity and net profit in the financial statements of Release Solar AS for 2022 was NOK 0.

Note 11 Inventory

The carrying value of projects under development are presented as inventories and are stated at the lower of cost and net realisable value. The project assets are related to solar, hydro and wind power plants under development and construction. The decrease from last year is mainly explained by projects reaching construction completion in South Africa and Pakistan.

Project geography

NOK million	2023	2022

Further, as an EPC contractor Scatec ASA may enter into purchase commitments with suppliers of equipment and sub-EPC services related to the plants under construction.

Contingent liabilities

Scatec ASA have no material contingent liabilities.

Note 17 Transactions with related parties

Related parties

Subsidiaries, joint ventures and associates
Key management personnel
Board of Directors

Transactions

Management, development and EPC services and financing
Loan and payroll
Board remuneration

Transactions with related parties

All related party transactions have been carried out as part of the normal course of business and at arm's length. The most significant transactions in 2023 and 2022 are:

Subsidiaries – EPC services

In 2023 Scatec ASA sold EPC services to subsidiaries amounting to NOK 6 116 million (572 million).

Subsidiaries – development services

During 2023 the company sold development project services amounting to NOK 80 million. Corresponding amount in 2022 was 83 million.

Subsidiaries - management service income

Scatec ASA has during 2023 charged NOK 49 million (47 million) for corporate services provided to its subsidiaries and associates.

Subsidiaries and associates – financing

In the course of the ordinary business, inter-company financing is provided from Scatec ASA to its subsidiaries. Long-term financing is interest bearing and priced at arm's length. Refer to Note 7 for specification of interest income/expenses from/to subsidiaries and Note 10 Investments in subsidiaries, joint ventures and associated companies.

Refer to Note 4 – Personnel expenses, number of employees and auditor's fee for information regarding transactions with key management personnel and board members.

Note 18 Subsequent events

Adjusting subsequent events

No adjusting events have occurred after the balance sheet date.

Non-adjusting subsequent event

In line with the terms adopted by the Annual General Meeting of Scatec ASA in 2023, the Board of Directors continue the share-based incentive programme for leading employees of the company, following the same principles as previous years. On 3 January 2024, a total of 1,515,886 share options were granted to leading employees. Refer to Note 32 in the consolidated financial statement of the Group for details related to the share-based incentive program.

On 25 January 2024, Scatec ASA agreed refinancing terms for its USD 150 million green term loan, with USD 135 million outstanding as the end of the fourth quarter 2023 and on 31 January 2024, Scatec ASA successfully issued a NOK 1,750 million bond. In conjunction with the bond issue, on 1 February 2024 Scatec bought back EUR 136 million of outstanding bonds.

Responsibility statement

We confirm to the best of our knowledge, that the consolidated financial statements for 2023 has been prepared in accordance with IFRS Accounting Standards as adopted by EU, and that the information gives a true and fair view of the Group's assets, liabilities, financial position and result for the period. We also confirm that presented information provides a fair overview of important events that have occurred during the period and their impact on the financial statements, key risk and uncertainty factors that Scatec is facing during the next accounting period.

Terje Piskvig (CEO)

Alternative Performance Measures

Scatec discloses alternative performance measures (APMs) in addition to those normally required by IFRS. This is based on the Group's experience that APMs are frequently used by analysts, investors and other parties for supplemental information.

The purpose of APMs is to provide an enhanced insight into the operations, financing and future prospect of the Group. Management also uses these measures internally to drive performance in terms of long-term target setting. APMs are adjusted IFRS measures that are defined, calculated and used in a consistent and transparent manner over the years and across the Group where relevant.

Financial APMs should not be considered as a substitute for measures of performance in accordance with IFRS. Disclosures of APMs are subject to established internal control procedures.

Definition of alternative performance measures used by the Group for enhanced financial information

Cash flow to equity: is a measure that seeks to estimate value creation in terms of the Group's ability to generate funds for equity investments in new power plant projects and/or for shareholder dividends over time. Management believes that the cash flow to equity measure provides increased understanding of the Group's ability to create funds from its investments. The measure is defined as EBITDA less net interest expense, normalised loan repayments and normalised income tax payments, plus any proceeds from refinancing. The definition excludes changes in net working capital, investing activities and fair value adjustment of first-time recognition of joint venture investments. Normalised loan repayments are calculated as the annual repayment divided by four quarters for each calendar year. However, loan repayments are normally made bi-annually. Loan repayments will vary from year to year as the payment plan is based on a sculpted annuity. Net interest expense is here defined as interest income less interest expenses, excluding shareholder loan interest expenses, non-recurring fees and accretion expenses on asset retirement obligations. Normalised income tax payment is calculated as operating profit (EBIT) less normalised net interest expense multiplied with the nominal tax rate of the jurisdiction where the profit is taxed.

EBITDA: is defined as operating profit adjusted for depreciation, amortisation and impairments.

EBITDA margin: is defined as EBITDA divided by total revenues and other income.

EBITDA and EBITDA margin are used for providing consistent information of operating performance which is comparable to other companies and frequently used by other stakeholders.

Gross profit: is defined as total sales revenue including net gain/loss from sale of project assets and net gain/loss from associates minus the cost of goods sold (COGS). Gross profit is used to measure project profitability in the D&C segment.

Net revenues: include energy sales revenues net of significant cost items directly linked to the energy sales volume (such as cost of energy purchase) in the PP segment. Refer to Note 3 Operating segments for further details.

Gross interest-bearing debt: is defined as the Group's total debt obligations and consists of non-current and current external non-recourse financing and external corporate financing and other interest-bearing liabilities, irrespective of its maturity as well as bank overdraft.

Net interest-bearing debt (NIBD): is defined as gross interest-bearing debt, less cash and cash equivalents. NIBD does not include shareholder loans.

Net working capital includes trade- and other receivables, other current assets, trade- and other payables, income tax payable and other current liabilities.

Proportionate Financials

The Group's segment financials are reported on a proportionate basis. The consolidated revenues and profits are mainly generated in the Power Production segment. Activities in Services and Development & Construction segment mainly reflect deliveries to other companies controlled by Scatec (with from 33% to 100% economic interest), for which revenues and profits are eliminated in the Consolidated Financial Statements. With proportionate financials Scatec reports its share of revenues, expenses, profits and cash flows from all its subsidiaries without eliminations based on Scatec's economic interest in the subsidiaries. The Group introduced Proportionate Financials as the Group is of the opinion that this method improves earnings visibility. The key differences between the proportionate and the consolidated IFRS financials are that;

- Internal gains are eliminated in the consolidated financials but are retained in the proportionate financials. These internal gains primarily relate to gross profit on D&C goods and services delivered to project companies which are eliminated as a reduced group value of the power plant compared to the stand-alone book value. Similarly, the consolidated financials have lower power plant depreciation charges than the proportionate financials since the proportionate depreciations are based on power plant values without elimination of internal gain. Internal gain eliminations also include profit on Services delivered to project companies.
- The consolidated financials are presented on a 100% basis, while the proportionate financials are presented based on Scatec's ownership percentage/economic interest.
- In the consolidated financials joint venture companies are equity consolidated and are presented with Scatec's share of the net profit on a single line in the statement of profit or loss. In the proportionate financials the joint venture companies are presented in the same way as other subsidiaries on a gross basis in each account in the statement of profit or loss.

In 2023 Scatec reports a proportionate operating profit of NOK 2,152 million compared with an operating profit of NOK 2,625 million in the consolidated financials. To arrive at the proportionate operating profit from the consolidated operating profit the Group has;

1. removed from the consolidated statement of profit or loss the internal gain on transactions between group companies with a positive amount of NOK 97 million.
2. removed the non-controlling interests share of the operating profit of NOK 709 million to only leave the portion corresponding to Scatec's ownership share,
3. replaced the consolidated net profit from joint venture companies of NOK 46 million with Scatec's share of the Operating profit from the joint venture companies with NOK 379 million.

See Note 3 for further information on the reporting of proportionate financial figures, including reconciliation of the proportionate financials against the consolidated financials.

Other definitions

Backlog

Project backlog is defined as projects with a secure off-take agreement assessed to have more than 90% probability of reaching financial close and subsequent realisation.

Pipeline

The pipeline projects are in different stages of development and maturity, but they are all typically in markets with an established government framework for renewables and for which project finance is available (from commercial banks or multilateral development banks). The project sites and concessions have been secured and negotiations related power sales and other project implementation agreements are in various stages of completion.

Scatec's economic interest

Scatec's share of the total estimated economic return from its subsidiaries. For projects in development and construction the economic interest is subject to change from the development of the financial model.

Cash in power plant companies in operation

Comprise restricted cash in proceed accounts, debt service reserve accounts, disbursements accounts, maintenance and insurance reserve accounts and similar. These cash and cash equivalents are only available to the Group through distribution as determined by shareholder and non-recourse financing agreements.

Cash in power plant companies under development/construction

Comprise shareholder financing and draw down on term loan facilities by power plant companies to settle outstanding external EPC invoices.

Project equity

Project equity comprise of equity and shareholder loans in power plant companies.

Recourse Group

Recourse Group means all entities in the Group, excluding renewable energy companies (each a recourse group company).

Definition of project milestones

Commercial Operation Date (COD): A scheduled date when certain formal key milestones have been reached, typically including grid compliance, approval of metering systems and technical approval of plant by independent engineers. Production volumes have reached normalised levels sold at the agreed off-taker agreement price. This milestone is regulated by the off-taker agreement with the power off-taker. In the quarterly report grid connection is used as a synonym to COD.

Financial close (FC): The date on which all conditions precedent for drawdown of debt funding has been achieved and equity funding has been subscribed for, including execution of all project agreements. Notice to proceed for commencement of construction of the power plant will normally be given directly thereafter. Projects in Scatec defined as "backlog" are classified as "under construction" upon achievement of financial close.

Auditor's Report

To the General Meeting of Scatec ASA

Independent Auditor's Report

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Scatec ASA, which comprise:

- the financial statements of the parent company Scatec ASA (the Company), which comprise the statement of financial position as at 31 December 2023, the statement of income and statement of cash flow for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and
- the consolidated financial statements of Scatec ASA and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at 31 December 2023, the consolidated statements of profit and loss, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flow for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion

- the financial statements comply with applicable statutory requirements,
- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2023, and its financial performance and its cash flows for the year then ended in accordance with Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and
- the consolidated financial statements give a true and fair view of the financial position of the Group as at 31 December 2023, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as adopted by the EU.

Our opinion is consistent with our additional report to the Audit Committee.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company and the Group as required by relevant laws and regulations in Norway and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

To the best of our knowledge and belief, no prohibited non-audit services referred to in the Audit Regulation (537/2014) Article 5.1 have been provided.

We have been the auditor of the Company for 2 years from the election by the general meeting of the shareholders on 29 April 2022 for the accounting year 2022.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The Group's business activities are largely unchanged compared to last year. *Impairment Assessment of Ukrainian Assets* and *IFRS 10 Control Assessment* have the same characteristics and risks as in the prior year, and therefore continues to be a areas of focus this year.

Key Audit Matters	How our audit addressed the Key Audit Matter
<p>Impairment Assessment of Ukrainian Assets</p> <p>During the prior year the war triggered an impairment of Scatec's solar power plants located in Ukraine, amounting to NOK 816 million. This represented approximately 28% of the carrying value of the assets before impairment. The future operational performance of these solar power plants and the outcome of the ongoing war were identified as, and continues to be, significant factors that could impact the estimated future cash flows from these assets. In the current year, no further impairments have been recognized for Ukrainian assets.</p> <p>In forecasting future cash flows, significant assumptions are made concerning future revenues and country risk, particularly the risk related to the ongoing war. Management uses weighted scenarios to estimate the value in use for the solar power plants.</p> <p>We continue to focus on the impairment assessment of Ukrainian assets due to the high level of estimation uncertainty, complexity, and subjectivity involved in determining the value in use of these assets. Furthermore, the continued volatile situation in Ukraine adds a layer of complexity to the assumptions used in the impairment testing.</p> <p>Management's impairment testing, including the use of scenarios and the sensitivity of key assumptions, is explained in note 13 to the consolidated financial statements.</p>	<p>We obtained and challenged management's impairment assessment and the process by which this was performed. We assessed management's accounting policy against IFRSs and obtained explanations from management as to how the specific requirements of the standards, in particular IAS 36 – Impairment of assets, were met.</p> <p>To assess each of the assumptions in the impairment assessment, we interviewed management on and challenged their assumptions. We also involved our internal specialists to assist in the review of the impairment model and the assumptions used. We used external market data to assess the assumptions used to build the discount rate. We found that the discount rate was within an appropriate range.</p> <p>We evaluated management's assumptions related to future revenues and checked current and historical prices in the Power Purchase Agreements (PPA) to corroborate the power rates assessed by management within the PPA duration. For power prices beyond the PPA period, we examined external market forecasts for the power market in Ukraine. We considered that power rates used by management were within an appropriate range.</p> <p>Further, we discussed management's expectations regarding the future utilisation of the assets and their ability to earn revenue in the near future. Management's expectations about future development were corroborated to, and found to be in line with, information from reliable external sources which discuss the various possible outcomes of the war. We performed an analysis of the significant assumptions to evaluate the implied sensitivity of the valuation models. Naturally, to foresee the outcome of the war with a reasonable degree of certainty, is at best a highly judgmental exercise. The assessed values are therefore sensitive to changes in the probabilities for different possible outcomes used in the valuation model and for changes in the discount rate.</p> <p>We also assessed the related disclosures provided, in particular disclosures about key assumptions</p>

and sensitivities, and found them to be adequate and in accordance with the accounting requirements.

IFRS 10 Control Assessment

The Group has entered into partnerships for shareholding of project companies owning solar power plants. Scatec seeks to obtain operational and financial control of the project companies also when Scatec's ownership is less than 50% of the shares.

Based on the criteria in IFRS 10 regarding control, other factors than ownership can be decisive as to whether Scatec has control. Management's assessment of control is based on shareholder agreements and other contractual arrangements. Assessments of control are performed when new projects are acquired, and an annual reassessment is performed for material project companies.

We focused on this area because of the complexity involved in the assessments, the use of management judgment, and the impact these assessments may have on classification and presentation of the project companies in the consolidated financial statements.

For more information on investments in joint ventures, refer to notes 2, and 14 to the consolidated financial statement.

We evaluated and challenged management's assessment of control for new project companies, and the annual reassessment for material project companies. We performed inquiries on the process to assess the requirements for control in IFRS 10 and further performed the procedures described below.

We reviewed shareholder agreements and other key contractual agreements such as development, financing, Engineering, Procurement and Construction (EPC) and Operation & Maintenance (O&M) agreements.

We assessed management's evaluation against IFRS 10 criteria: power, exposure or rights to variable returns, and the ability to use power to affect returns. Our procedures included testing whether the role that Scatec has in the projects is defined in the contract, to understand the ability of Scatec to direct relevant activities. In addition, we tested the negotiated terms and conditions outlined in the agreements, to conclude on exposure to variable returns.

We found that the information provided in the notes to the consolidated financial statement are consistent with the assessments performed by management.

Other Information

The Board of Directors and the Managing Director (management) are responsible for the information in the Board of Directors' report and the other information accompanying the financial statements. The other information comprises information in the annual report, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the information in the Board of Directors' report nor the other information accompanying the financial statements.

In connection with our audit of the financial statements, our responsibility is to read the Board of Directors' report and the other information accompanying the financial statements. The purpose is to consider if there is material inconsistency between the Board of Directors' report and the other information accompanying the financial statements and the financial statements or our knowledge obtained in the audit, or whether the Board of Directors' report and the other information accompanying the financial statements otherwise appear to be materially misstated. We are required to report if there is a material misstatement in the Board of Directors' report or the other information accompanying the financial statements. We have nothing to report in this regard.

Based on our knowledge obtained in the audit, it is our opinion that the Board of Directors' report

- is consistent with the financial statements and

- contains the information required by applicable statutory requirements.

Our opinion on the Board of Director's report applies correspondingly to the statements on Corporate Governance and Corporate Social Responsibility.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation of financial statements of the Company that give a true and fair view in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for the preparation of the consolidated financial statements of the Group that give a true and fair view in accordance with IFRS Accounting Standards as adopted by the EU. Management is responsible for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern. The financial statements of the Company use the going concern basis of accounting insofar as it is not likely that the enterprise will cease operations. The consolidated financial statements of the Group use the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error. We design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's and the Group's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's and the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and the Group to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.

- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Report on Compliance with Requirement on European Single Electronic Format (ESEF)

Opinion

As part of the audit of the financial statements of Scatec ASA, we have performed an assurance engagement to obtain reasonable assurance about whether the financial statements included in the annual report, with the file name "Scatec Annual Report 2023.zip", have been prepared, in all material respects, in compliance with the requirements of the Commission Delegated Regulation (EU) 2019/815 on the European Single Electronic Format (ESEF Regulation) and regulation pursuant to Section 5-5 of the Norwegian Securities Trading Act, which includes requirements related to the preparation of the annual report in XHTML format, and iXBRL tagging of the consolidated financial statements.

In our opinion, the financial statements, included in the annual report, have been prepared, in all material respects, in compliance with the ESEF regulation.

Management's Responsibilities

Management is responsible for the preparation of the annual report in compliance with the ESEF regulation. This responsibility comprises an adequate process and such internal control as management determines is necessary.

Auditor's Responsibilities

For a description of the auditor's responsibilities when performing an assurance engagement of the ESEF reporting, see: <https://revisorforeningen.no/revisjonsberetninger>
